Reinforce your understanding of the concepts in Patton and Thibodeau's The Human Body in Health & Disease, 6th Edition! Corresponding to the chapters in the text, this study guide reviews essential medical terminology, concepts and processes related to the anatomy and physiology of the human body, and body function in health and disease. A variety of exercises make it easy to review and apply key concepts, and labeling of anatomy drawings helps you learn anatomical structures and terminology. UPDATED! Did You Know? provides fun, interesting facts on A&P topics. A brief synopsis at the beginning of each chapter previews core concepts that will be covered. Crossword Puzzle, Unscramble and Word Find activities help you learn new vocabulary terms and their proper spelling. Diagrams and labeling exercises reinforce your understanding of where the structures of the body are located. Answers to exercises are located in the back of the study guide, along with page-number references to the textbook. NEW! Know Your Medical Terms exercises help you learn and understand the various word parts used in medical terminology, as presented in the new Language of Science and Language of Medicine word lists in the textbook. Matching and fill-in-the-blank exercises enhance your comprehension of chapter content. Application questions develop your critical thinking skills and help you apply information to real-world scenarios.

This highly visual text is the perfect companion for anyone studying anatomy and physiology. Offering innovative techniques to help students with their learning, this user-friendly, accessible study skills text is the perfect accompaniment to any course or textbook. Complex processes are brought to life with imaginative diagrams and storylines which aid understanding, reinforce memory and also support students with memory, dyslexic or mathematical difficulties. New to this edition is a fully updated section on First Aid, and brand new content on making posters and presentations

Students study the major systems of the body: Skeletal, Muscular, Respiratory, Circulatory, Digestive and Nervous systems, in this highly motivating unit. The first part, "Core Lessons", covers the body systems with student notes providing a solid foundation of information. Related activities that utilize the visual arts, creative writing, physical activity and mathematics help to solidify the concepts taught in this lesson. Optional activities give teachers flexibility as the unit progresses. This mountain of innovative, time-saving teacher resources is sure to make life easier. This Life Science lesson provides a teacher and student section with a variety of reading passages, activities, crossword, word search and answer key to create a well-rounded lesson plan.
