Conventional wisdom says the universe is infinite. But could it be finite, merely giving the illusion of infinity? Modern science is beginning to drag this abstract issue into the realm of the real, the tangible and the observable. HOW THE UNIVERSE GOT ITS SPOTS looks at how science is coming up sharp against the mind-boggling idea that the universe may be finite. Through a decade of observation and thought-experiment, we have started to chart out the universe in which we live, just as we have mapped the oceans and continents of our planet. Through a kind of cosmic archaeology and without leaving Earth, we can look at the pattern of hot spots left over from the big bang and begin to trace the 'shape of space'. Beautifully written in a colloquial style by a world authority, Janna Levin explores our aspirations to observe our universe and contemplate our deep connection with it.

Sharing our stories, who we are, what we love, how we feel, why we fear, connects us to one another. Weaving moments of grace with spiritual practices that have grounded her through life's challenges, Laurie Blefeld invites the reader into her sacramental stories. You will find yourself in Laurie's stories and reclaim bits and pieces of

Laurie's generous prose connects us to her family's living history - and through it to our own. She is a natural spiritual teacher. Moments of Grace is luminous, warm, comforting and filled with such good practices."- Dr. Joan Borysenko, from the Foreword

"A wonderfully illustrated biography" of one of history's greatest warships whose sinking "signaled the end of the surety that Britannia ruled the waves" (War History Online). Unmatched for beauty, unequalled for size, for twenty years the HMS Hood was the glory ship of the Royal Navy, flying the flag across the world in the twilight years of the British Empire. Here, in words, photos and color illustrations, is the story of her life, her work and her people from keel-laying on the Clyde in 1916 to destruction at the hands of the Bismarck in 1941. Among the eye-catching strengths of the book is a

unique gallery of photos, including stills from a recently discovered piece of color footage of the ship, plus a spectacular set of computer-generated images of both the exterior and interior by the world's leading exponent of the art—a man who worked with the film director James Cameron (of Titanic fame). A wealth of new information on Hood's structure and operation make it essential reading for the enthusiast, modeler and historian alike. Hugely successful from its first publication, this is the third printing of the ultimate book on the ultimate ship of the pre-war era. "The most comprehensive study of a modern warship ever undertaken."—Warship World
