Over the course of all these years, our organization CTAC has proposed and put into practice myriad exercises for the world of animal assisted interventions. Each and every one of them has been documented, evaluated and employed by the various professionals with whom we've had the pleasure of sharing our work. All these exercises have contributed to achieving, by way of play, previously established objectives and, above all, have brought a smile to the faces of many individuals who our dogs have had the pleasure of working with. This book is intended as a guide for Animal Assisted Interventions professionals. In it, experts and technicians will find abundant ideas for creating new activities that enrich their work and help attain their therapeutic goals.

An excellent resource for pet therapy teams, educators, and therapists, this text presents clearly outlined instructions with educational and clinical application suggestions from a pioneer in the area of pet therapy.

Animal Assisted Therapy in Counseling is the most comprehensive book available dedicated to training mental health practitioners in Animal Assisted Therapy (AAT). It explains the history and practice of AAT in counseling, discusses the latest empirical research, and provides an in-depth explanation of the psychodynamics of AAT within various theoretical frameworks. Readers will learn the proper way to select, train, and evaluate an animal for therapy. The use of a number of different therapy animals is considered,

including dogs, cats, horses, birds, farm animals, rabbits and other small animals, and dolphins. Guidelines for implementing AAT in settings such as private practices, community agencies, schools, hospices, and prisons are covered, as well as ethical and legal considerations, risk management, diversity issues, and crisis and disaster response applications. Numerous case examples illustrate the use of AAT principles with clients, and forms, client handouts, and other resources provide valuable tools. This unique resource is an indispensable guide for any counselor looking to develop and implement AAT techniques in his or her practice.

The original edition was the first book to provide a comprehensive overview of the ways in which animals can assist therapists with treatment of specific populations, and/or in specific settings. The second edition continues in this vein, with 7 new chapters plus substantial revisions of continuing chapters as the research in this field has grown. New coverage includes: Animals as social supports, Use of AAT with Special Needs students, the role of animals in the family-insights for clinicians, and measuring the animal-person bond.
*Contributions from veterinarians, animal trainers, psychologists, and social workers
*Includes guidelines and best practices for using animals as therapeutic companions
*Addresses specific types of patients and environmental situations

The integration of animals into the therapy setting by psychotherapists has been a growing trend. Psychological problems treated include emotional and behavioral problems, attachment issues, trauma, and developmental disorders. An influential 1970s survey suggests that over 20 percent of therapists in the psychotherapy division of the American

Psychological Association incorporated animals into their treatment in some fashion. Anecdotal evidence suggests that the number is much higher today. Since Yeshiva University psychologist Boris Levinson popularized the involvement of animals in psychotherapy in the 1960s, Israel has come to be perhaps the most advanced country in the world in the area of animal-assisted psychotherapy (AAP). This is true especially in the areas of academic training programs, theory-building, and clinical practice. Great effort has been put into understanding the mechanisms behind AAP, as well as into developing ethical guidelines that take into account the therapist's responsibility toward both client and animal. This book exposes the world to the theory and practice of AAP as conceived and used in Israel. It emphasizes evidence-based and clinically sound applications with psychotherapeutic goals, as differentiated from other animal-assisted interventions, such as AAE (animal-assisted education) and AAA (animal-assisted activities), which may have education or skills-oriented goals. Not just anyone with a dog can call him-or herself an animal-assisted therapist. This volume demonstrates not only the promise of animal-assisted psychotherapeutic approaches, but also some of the challenges the field still needs to overcome to gain widespread legitimacy.

Handbook on Animal-Assisted Therapy: Foundations and Guidelines for Animal-Assisted Interventions, Fifth Edition highlights advances in the field, with seven new chapters and revisions to over 75% of the material. This book will help therapists discover the benefits of incorporating animal assisted therapy into their practice, how to design and implement animal assisted interventions, and the efficacy of animal assisted therapy with different disorders and patient populations. Coverage includes the use of AAT with children,

families and the elderly, in counseling and psychotherapy settings, and for treating a variety of specific disorders. Contains seven new chapters in addition to 75% new or revised material Includes guidelines and best practices for using animals as therapeutic companions Addresses specific types of patients and environmental situations Includes AAI working with cats, dogs, birds, and horses Discusses why animals are used in therapy, as well as how

Complementary Therapies (CT) refers to the practices, products, or health systems that are outside the realm of conventional medicine, used to treat disease or to promote health and well-being. Defining CT is difficult, because the field is very broad and constantly changing. The title of this book includes the words body, mind, and soul. The body and the mind (and their reciprocal relations) have been extensively studied scientifically. What about the soul? The book brings some points about this new ground in CT. We hope you find in the present work the sincere desire to collaborate with the dissemination of knowledge. May this book be useful and pleasant to you.

This book is packed with 190 pages of step-by-step instructions for 101 practical animal-assisted therapy activities and interventions. There is also an index that correlates the activities with a myriad of goals in the areas of physical therapy, occupational therapy, mental health, social skills, educational skills, speech therapy, and recreational therapy. You will also find recipes to make for animals, animal-related booklists, and animal-related songs. This book is not limited to animal-assisted therapy with dogs. It also includes small animals, cats, birds, and horses. If you are a handler of a therapy animal, a trainer of therapy teams, or if you are a professional who incorporates animal assisted therapy into

your practice, this book was written for you.

The third edition of *Animal-Assisted Therapy in Counseling* is the most comprehensive book available dedicated to training mental health practitioners in the performance of animal assisted therapy in counseling (AAT-C). New to this edition is discussion of the human-animal relational theory, a new theory dedicated to the practice of AAT-C. This edition also has added applications for supervision and includes the most recent research and practice. Consistent with previous editions, a variety of animal-assisted interventions are described with case examples provided in a variety of settings with different types of animals. This unique resource is an indispensable guide for any counselor or psychotherapist looking to develop and implement AAT techniques in practice.

"This book will help licensed professional counselors incorporate Equine Assisted Counseling (EAC) into their practices, even those who have no prior experience working with horses. It provides a strong research foundation for understanding the efficacy of equine assisted interventions and the potentially powerful impact that a horse can have in creating a new counseling dynamic. Chapters address using horses to help clients dealing with various traumas and abuse, anxiety, depression, atypical behaviors, and social skills and communication issues. One chapter is written by the internationally renowned "horse whisperer" Pat Parilli and offers a look at EAC from the horse's point of view and describes the process of developing a relationship with the horse in a positive, safe, and respectful manner, an important topic to ensure the well-being of the horse throughout a session. Counselors will find this a valuable resource for understanding and utilizing EAC as a new resource in their own practices, as will students seeking to learn about this
