If it is true that our children are most impressionable at an early age, then it's quite elementary to start providing opportunities of life changing alternatives that will help our children realize and develop toward their full potential as productive members of our society. The activities designed in this Student Activities Workbook are to be use in accordance with the Business and Career Exploration Program Curriculum. The Business and Career Exploration Program represents a state of the art initiative and first of its kind that comprehensively provides elementary and middle school aged children with reality based positive life experiences of business and career options through personalized assembly presentations, learning projects, entrepreneurship opportunities, mentoring, visitations, and special corporate incentives. The program for many of our youngest citizens reignites the flame and dreams of what our children's lives can become. With each educational and life experience our children gain a greater understanding of various professions and what they would like to become as working adults. The activities in this

workbook are not only enjoyable, but highly interactive and challenging to promote the awareness of our children's potential. Specific objectives of the workbook include concepts of self-knowledge, development of a basic understanding of interests, likes and dislikes, how to interact with others, an Educational and Occupational Exploration component and a special involvement project entitled Minding My Own Business / Career Planning which facilitates the awareness of children's abilities regarding entrepreneurship opportunities. The various activities are designed to raise awareness of the relationship between work and learning to the needs and functions of society and the interrelationships of life roles. The elementary grades are also a good time to introduce the importance of personal responsibility, good work habits and the benefits of educational achievement.

Reproducible student activities cover early Native American settlements, African and western European influences, and Spanish and Portugese exploration.

and Gizmos, Grades 9–12, encourage your high school students to explore a variety of phenomena involved with pressure and force, thermodynamics, energy, light and color, resonance, buoyancy, two-dimensional motion, angular momentum, magnetism, and electromagnetic induction. The authors say there are three good reasons to buy this book: 1. To improve your students' thinking skills and problem-solving abilities 2. To acquire easy-to-perform experiments that engage students in the topic 3. To make your physics lessons waaaaay more cool The phenomenon-based learning (PBL) approach used by the authors—two Finnish teachers and a U.S. professor—is as educational as the experiments are attention-grabbing. Instead of putting the theory before the application, PBL encourages students to first experience how the gadgets work and then grow curious enough to find out why. Students engage in the activities not as a task to be completed but as exploration and discovery. The idea is to help your students go beyond simply memorizing physics facts. Using Physics Gadgets and Gizmos can help them learn broader concepts, useful critical-thinking skills, and science and engineering practices (as defined by the Next Generation Science Standards). And—thanks to those Boomhackers and Flying Pigs—both your students and you will have some serious fun. Students will gain a solid overview of Old World history as they study this text. The book opens with the collapse of the Roman Empire and the rise of Christianity in Europe. It then covers the Dark Ages, the Renaissance, the Reformation, and the early era of exploration. Readers discover why so many of the religious beliefs and cultural values of Medieval Europe were later transplanted in the Americas. Includes chapter questions, vocabulary drills, and maps.
