The Republican Roman army suffered heavy losses as a result of the 'hit and run' tactics employed by the Hispanics in Ancient Spain. After preparatory chanting, the Celt-Iberians would attack en masse and in apparent

disorder. At a pre-arranged signal the warriors would retreat as if defeated. This sequence might be repeated over several days, until finally the Romans lost their discipline and broke formation in pursuit. At this point the Hispanics would quickly mount a counter-attack that would decimate the legions. This volume explores the organisation, tactics, history, arms and armour of Rome's Spanish enemies.

Throughout most of the classical period, Persia was one of the great superpowers, placing a limit on the expansion of Western powers. It was the most formidable rival to the Roman empire for centuries, until Persia, by then under the Sassanians,

was overwhelmed by the Islamic conquests in the seventh century AD. Yet, the armies of ancient Persia have received relatively little detailed attention, certainly in comparison to those of Rome. This work is the first of three volumes that will form the most comprehensive study of ancient Persian armies available. The Sassanians, the native Iranian dynasty that ousted their Parthian overlords in AD 226, developed a highly sophisticated army that was able for centuries to hold off all comers. They continued the Parthians famous winning combination of swift horse archers with heavily-armored cataphract cavalry, also making much use of war elephants, but Kaveh Farrokh interestingly

demonstrates that their oft-maligned infantry has been much underestimated. The author, born in Athens, Greece, and expert in ancient Persian languages and military history, has been researching the military history and technology of Persia for a quarter of a century. He draws on the latest research and new archaeological evidence, focusing on the organization, equipment and tactics of the armies that dominated the ancient Middle East for so long.

Together, they present a uniquely eastern tradition of warfare that emphasizes speed, stealth, and cunning. This collection includes:

whole ancient period, such as the defeat of the Persians at Marathon, the Spartans' heroic last stand at Thermopylae, the gruelling Pelopponesian War and the epic March of the Ten Thousand. The Greek heavy infantry spearmen, or hoplites, are one of the most recognizable types of ancient warrior and their tightly-packed phalanx formation dominated the battlefield.

Covering the period from the Persian Wars to the Macedonian victory at the Battle of Chaeronea, Gabriele Esposito examines not only the hoplites but also the other troops that featured in Greek armies with growing importance as time went on, such as light infantry skirmishers and cavalry. He
