Updated and revised, the highly-anticipated second edition of The Blackwell Companion to Consciousness offers a collection of readings that together represent the most thorough and comprehensive survey of the nature of consciousness available today. Features updates to scientific chapters reflecting the latest research in the field Includes 18 new theoretical, empirical, and methodological chapters covering integrated information theory, renewed interest in panpsychism, and more Covers a wide array of topics that include the origins and extent of consciousness, various consciousness experiences

such as meditation and drug-induced states, and the neuroscience of consciousness Presents 54 peer-reviewed chapters written by leading experts in the study of consciousness, from across a variety of academic disciplines

With fifty-five peer reviewed chapters written by the leading authors in the field, The Blackwell Companion to Consciousness is the most extensive and comprehensive survey of the study of consciousness available today. Provides a variety of philosophical and scientific perspectives that create a breadth of understanding of the topic Topics include the origins and extent of consciousness, different consciousness experiences, such as meditation and drug-induced states, and the neuroscience of consciousness

With the help of in-depth essays from some of the world's leading philosophers, The Blackwell Companion to Natural Theology explores the nature and existence of God through human reason and evidence from the natural world. Provides in-depth and cutting-edge treatment of natural theology's main arguments Includes contributions from first-rate philosophers well known for their work on the relevant topics Updates relevant arguments in light of the most current, state-of-the-art philosophical and scientific discussions Stands in useful contrast and opposition to the arguments of the 'new atheists'

A benchmark volume for an emerging field where mental disorders serve as the springboard for philosophical insights.

A groundbreaking collection of contemporary essays from leading international scholars that provides a balanced and expert account of the resurgent debate about substance dualism and its physicalist alternatives. Substance dualism has for some time been dismissed as an archaic and defeated position in philosophy of mind, but in recent years, the topic has experienced a resurgence of scholarly interest and has been restored to contemporary prominence by a growing minority of philosophers prepared to interrogate the core principles upon which past objections and misunderstandings rest. As the first book of its kind to bring together a collection of contemporary writing from top proponents and critics in a pro-contra format, The Blackwell Companion to Substance Dualism captures this ongoing dialogue and sets the stage for rigorous and lively discourse around dualist and physicalist accounts of human persons in philosophy. Chapters explore emergent, Thomistic, Cartesian, and other forms of substance dualism—broadly conceived—in dialogue with leading varieties of physicalism, including animalism, non-reductive physicalism, and constitution theory. Loose, Menuge, and Moreland pair essays from dualist advocates with astute criticism from physicalist opponents and vice versa, highlighting points of contrast for readers in thematic sections while showcasing today's leading minds engaged in direct debate. Taken together, essays provide nuanced paths of introduction for students, and capture the imagination of professional philosophers looking to expand their understanding of the subject. Skillfully curated and in touch with contemporary science as well as analytic theology, The Blackwell Companion to Substance Dualism strikes a measured balance between advocacy and criticism, and is a first-rate resource for researchers, scholars, and students of philosophy, theology, and neuroscience.

"Hart features a chorus of voices, ancient and modern, famous and little known. All worldviews are faith views; he finds insightful accounts of religion and ecology around the globe. We welcome his inclusive, if diverse, human communities integrated with the wellbeing of Earth and all biota (his socioecological praxis ethics). Highly recommended, especially for libraries." Holmes Rolston III, Colorado State University Foreword by Ecumenical Patriarch Bartolomew I and Afterword by John Cobb In the face of the current environmental crisis—which clearly has moral and spiritual dimensions—members of all the world's faiths have come to recognize the critical importance of religion's relationship to ecology. The Wiley Blackwell Companion to Religion and Ecology offers a comprehensive overview of the history and the latest developments in religious engagement with environmental issues throughout the world. Newly commissioned essays from noted scholars of diverse faiths and scientific traditions present the most cutting-edge thinking on religion's relationship to the environment. Initial readings explore the ways traditional concepts of nature in Christianity, Judaism, Islam, Buddhism, and other religious traditions have been shaped by the environmental crisis. Readings then address the changing nature of theology and religious thought in response to the challenges of protecting the environment. Various conceptual issues and themes that transcend individual traditions—climate change, bio-ethics, social justice, ecofeminism, and more—are then analyzed before a final section examines some of the immediate challenges we face in caring for the Earth while looking to the future of religious environmentalism. Timely and thought-provoking, The Wiley Blackwell Companion to Religion and Ecology offers illuminating insights into the role of religion in the ongoing struggle to secure the future well-being of our natural world.

A Companion to the Philosophy of Time presents the broadest treatment of this subject yet; 32 specially commissioned articles - written by an international line-up of experts - provide an unparalleled reference work for students and specialists alike in this exciting field. The most comprehensive reference work on the philosophy of time currently available The first collection to tackle the historical development of the philosophy of time in addition to covering contemporary work Provides a tripartite approach in its organization, covering history of the philosophy of time, time as a feature of the physical world, and time as a feature of experience Includes contributions from both distinguished, well-established scholars and

rising stars in the field

First Published in 2009. Routledge is an imprint of Taylor & Francis, an informa company.

This is a comprehensive collection of essays that explores cutting-edge work in experimental philosophy, a radical new movement that applies quantitative and empirical methods to traditional topics of philosophical inquiry. Situates the discipline within Western philosophy and then surveys the work of experimental philosophers by sub-discipline Contains insights for a diverse range of fields, including linguistics, cognitive science, anthropology, economics, and psychology, as well as almost every area of professional philosophy today Edited by two rising scholars who take a broad and inclusive approach to the field Offers a complete introduction for non-specialists and students to the central approaches, findings, challenges, and controversies in experimental philosophy

This monumental collection of new and recent essays from an international team of eminent scholars represents the best contemporary critical thinking relating to both literary and philosophical studies of literature. Helpfully groups essays into the field's main sub-categories, among them 'Relations Between Philosophy and Literature', 'Emotional Engagement and the Experience of Reading', 'Literature and the Moral Life', and 'Literary Language' Offers a combination of analytical precision and literary richness Represents an unparalleled work of reference for students and specialists alike, ideal for course use
