slightly older children. Many of the animals have patterns for both a large "mom or dad" version and a baby version, including the monkey, frog, cat, bunny, crocodile, dog, hippo, owl, kangaroo, fox, sheep, and penguin. There are also patterns for a mouse, horse, panda, unicorn, princess, and robot, and even a section on how to make little clothes for them to wear. Step-by-step instructions are given for all of the crocheted parts, as well as details on how to assemble. In addition, all of the crochet techniques used in the book are explained so that even beginners can make these ragdolls.

Square in New York. This is the only known art that has survived from this shop, where Samuel J. O'Reilley's modern-day electric tattoo machine was born and patented. The imagery of this classic flash preserves the origins of American tattoos, when tattoo art was transferred to the client from these templates via an acetate stencil. Everything was done by hand until O'Reilley's electrified tattoo machine changed history. This rich heritage of folk art has more than 900 individual pieces of flash that provide commentary on the shop's clientele and reveal some of the social, economic, and political ideas of the time. Including nautical themes, Asian imagery, flowers, boxers, circus characters, and plenty of girls, this is an exciting collection of early American flash and a necessary book for the tattoo artist, aficionado, and student.

An illuminating account of the design inspirations and technical transformations that have shaped the digital typefaces of the 21st century In this fascinating tour through typographic history, Paul Shaw provides a visually rich exploration of digital type revival. Many typefaces from the pre-digital past have been reinvented for use on computers and mobile devices, while other new font designs are revivals of letterforms, drawn from inscriptions, calligraphic manuals, posters, and book jackets. Revival Type deftly introduces these fonts, many of which are widely used, and engagingly tells their stories. Examples include translations of letterforms not previously used as type, direct revivals of metal and wood typefaces, and looser interpretations of older fonts. Among

these are variations on classic designs by John Baskerville, Giambattista Bodoni, William Caslon, Firmin Didot, Claude Garamont, Robert Granjon, and Nicolas Jenson, as well as typefaces inspired by less familiar designers, including Richard Austin, Philippe Grandjean, and Eudald Pradell. Updates and revisions of 20th-century classics such as Palatino, Meridien, DIN, Metro, and Neue Haas Grotesk (Helvetica) are also discussed. Handsomely illustrated with annotated examples, archival material depicting classic designs, and full character sets of modern typefaces, Revival Type is an essential introduction for designers and design enthusiasts into the process of reinterpreting historical type.

explores 15 of the most commonly used alphabet styles, placing the emphasis on developing rhythm in writing by building up experience through the practice of repetitive exercises.

Revised and expanded, this book is an excellent survey of bookhands with its full-page, enlarged illustrations and solidly researched sources. It is a useful text for studying the history of manuscripts as well as the details of letter construction. This work also helps one make judgments about the technical condition of letter writing and its qualities of rhythm and movement, possible only when consulting an original manuscript. The author has gone to considerable lengths to obtain photographs that are well-focused and lit so that the

tactile qualities of surfaces, ink tone, and flow are revealed. The author has chosen examples of formal writing that show a coherent and reasonably consistent relationship between methods of tool use and letter formation, making the construction of a script much easier to grasp in practice. He has also made the effort of selecting writing without idiosyncrasies of style."--
