Originally published on the eve of the 1848 European revolutions, The Communist Manifesto is a condensed and incisive account of the worldview Marx and Engels developed during their hectic intellectual and political collaboration. Formulating the principles of dialectical materialism, they believed that labor creates wealth, hence capitalism is exploitive and antithetical to freedom.

The “forgotten” second volume of Capital, Marx’s world-shaking analysis of economics, politics, and history, contains the vital discussion of commodity, the cornerstone to Marx’s theories.

This introductory text is a critical theory toolkit on how to how to make use of Karl Marx ‘ s ideas in media, communication, and cultural studies. Karl Marx ‘ s ideas remain of crucial relevance, and in this short, student-friendly book, leading expert Christian Fuchs introduces Marx to the reader by discussing 15 of his key concepts and showing how they matter for understanding the digital and communicative capitalism that shapes human life in twenty-first century society. Key concepts covered include: the dialectic, materialism, commodities, capital, capitalism, labour, surplus-value, the working class, alienation, means of communication, the general intellect, ideology, socialism, communism, and class struggles. Students taking courses in Media, Culture and Society; Communication Theory; Media Economics; Political Communication; and Cultural Studies will find Fuchs’ concise introduction an essential guide to Marx.

Renowned Marxist scholar and critical media theorist Christian Fuchs provides a thorough, chapter-by-chapter introduction to Capital Volume 1 that assists readers in making sense of Karl Marx ‘ s most important and groundbreaking work in the information age, exploring Marx ‘ s key concepts through the lens of media and communication studies via contemporary phenomena like the Internet, digital labour, social media, the media industries, and digital class struggles. Through a range of international, current-day examples, Fuchs emphasises the continued importance of Marx and his work in a time when transnational media companies like Amazon, Google, and Facebook play an increasingly important role in global capitalism. Discussion questions and exercises at the end of each chapter help readers to further apply Marx ‘ s work to a modern-day context.

Written during the winter of 1857-8, the Grundrisse was considered by Marx to be the first scientific elaboration of communist theory. A collection of seven notebooks on capital and money, it both develops the arguments outlined in the Communist Manifesto (1848) and explores the themes and theses that were to dominate his great later work Capital. Here, for the first time, Marx set out his own version of Hegel’s dialectics and developed his mature views on labour, surplus value and profit, offering many fresh insights into alienation, automation and the dangers of capitalist society. Yet while the theories in Grundrisse make it a vital precursor to Capital, it also provides invaluable descriptions of Marx’s wider-ranging philosophy, making it a unique insight into his beliefs and hopes for the foundation of a communist state.

Marx ‘ s Philosophy of Revolution in Permanence for Our Day: Selected Writings by Raya Dunayevskaya brings out the contemporary urgency of the totality of Marx ‘ s body of ideas and activities, and the inseparability of his economics, humanism, and dialectic.

This book is a key resource on the foundations of Marxist Internet and Digital Media Studies. It presents 16 contributions that show how Marx ‘ s analyses of capitalism, the commodity, class, labour, work, exploitation, surplus-value, dialectics, crises, ideology, class struggles, and communism help us to understand the Internet and social media in 21st century digital capitalism.

“This book is superb in every way.... [It] is the only book that attempts to put into perspective just what the possible relationship between praxis and Marxist criminology might (should) be.” –Eleanor Miller, University of Wisconsin, Milwaukee In this expanded and updated second edition of a revered reader in Marxist criminology, editor David F. Greenberg brings together writings about crime that range from classic articles by Karl Marx and Friedrich Engels to a variety of contemporary essays. Taking an explicitly Marxist point of view, the articles deal with various aspects of criminology, including organized crime, delinquency, urban crime, criminal law, and criminal justice. To the original text, Greenberg has added pieces on race and crime, gender and crime, rape, arson for profit, and auto theft. With extensive prefatory material prepared by Greenberg, as well as editorial notes, and a glossary of Marxist terminology, Crime and Capitalism is an indispensable text for students and professionals in the fields of criminology, criminal justice, social history, and sociology.
