concepts in the field in a more succinct, streamlined format. Based on real-world practices and current thinking, the text's presentation of strategic management features an increased emphasis on the business model concept as a way of framing the issues of competitive advantage. Cutting-edge research, new strategic management theory, and a hands-on approach allow students to explore major topics in management, including corporate performance, governance, strategic leadership, technology, and business ethics. In addition, a high-quality case program

This book gathers extended versions of the best papers presented at the Global Joint Conference on Industrial Engineering and Its Application Areas (GJCIE), held in Vienna on July 20-21, 2017. They offer a snapshot of the current state of the art in three main related fields of research, namely industrial engineering, engineering and technology management, and healthcare systems engineering management. The book is intended to integrate theory and practice and to merge different perspectives, from

research, and practical applications with current, real-world examples. This approach not only offers students a learning experience that uniquely combines rigor and relevance, but it also prepares them for the types of challenges they will face as managers in the globalized and turbulent business environment of the 21st century. Examples profile the products and services of companies that students are familiar with such as Facebook, Google, Starbucks, Apple and Uber. In its characteristic single, strong voice, Strategic Management

This open access book is based on "Spatonomy - Spatial Exploration of Economic Data", an interdisciplinary and international project in the frame of ERASMUS+ funded by the European Union. The project aims to exchange interdisciplinary knowledge in the fields of economics and geomatics. For the newly

introduced courses, interdisciplinary learning materials have been developed by a team of lecturers from four different universities in three countries. In a first study block, students were taught methods from the two main research fields. Afterwards, the knowledge gained had to be applied in a project. For this international project, teams were formed, consisting of one student from each university participating in the project. The achieved results were presented in a summer school a few months later. At this event, more methodological knowledge was

imparted to prepare students for a final simulation game about spatial and economic decision making. In a broader sense, the chapters will present the methodological background of the project, give case studies and show how visualisation and the simulation game works. and Performance" provides a theory-based, but hands-on approach to the study of strategic management. Emphasizing strategy development in highly competitive environments, it applies traditional theoretical principles and frameworks to today's dynamic business climate. It uses value creation and resource-based sustainability as central integrating concepts, enabling a broad discussion of stakeholders and organizational goals, as well as in-depth exploration of the foundation of superior long term performance. This book is

strongly grounded in contemporary strategic management theory, but it also has a very practical bent. Chapters provide guidance on actually putting the frameworks to use (e.g., steps to conduct an industry analysis, how to do a resource analysis, how to conduct a value chain analysis) along with examples of how to do so. Classroom-tested and peer-reviewed, the author employs a lively and engaging writing style that will appeal to students and instructors alike.
