Seven million people in the "breadbasket of Europe" were deliberately starved to death at Stalin's command. This story has been suppressed for half a century. Now, a survivor speaks. In 1929, in an effort to destroy the well-to-do peasant farmers, Joseph Stalin ordered the collectivization of all Ukrainian farms. In the ensuing years, a brutal Soviet campaign of confiscations, terrorizing, and murder spread throughout Ukrainian villages. What food remained after the seizures was insufficient to support the population. In the resulting famine as many as seven million Ukrainians starved to death. This poignant eyewitness account of the Ukrainian famine by one of the survivors relates the young Miron Dolot's day-to-day confrontation with despair and death—his helplessness as friends and family were arrested and abused—and his gradual realization, as he matured, of the absolute control the Soviets had over his life and the lives of his people. But it is also the story of personal dignity in the face of horror and humiliation. And it is an indictment of a chapter in the Soviet past that is still not acknowledged by Russian leaders.

Boards of directors are sitting ducks. Shareholders complain and even attack, management manipulates, and individual board members have little power, able to act only as part of the board as a whole. Governance issues are front and center, yet there is often little understanding, even among board members, of the key role that they play. Written in an accessible and human voice, *The Governance Revolution: What Every Board Member Needs to Know, NOW!* provides information and context essential to anyone seeking to understand how corporations and their stewards—the board of directors—can and should function in the volatile world we inhabit. Deborah Hicks Midanek offers useful insight into what board members of corporations actually do, the current standards for board members and why they exist. She includes a timely discussion of how clarity of purpose can improve board and director effectiveness. Informed by her long experience serving public, private, and family owned corporate boards as well as those of charitable, and government organizations, she provides essential context regarding the evolution of board practice as well as candid discussion of the issues involved in the relentless effort to improve corporate governance processes. Focused mainly on the dominant public corporation, she also explores the special challenges of serving private and family owned as well as nonprofit and public agency boards. Written by a seasoned board member, and liberally laced with stories and cases illustrating the tricky issues directors wrestle with, this book is the essential common-sense companion for anyone working with a board, serving on a board, or wanting to do so. Directors, aspiring directors, investors, and students of corporate behavior will benefit from this highly readable description of the cloistered boardroom.
