Aspiring college students and their families have many options. A student can attend an in-state or an out-of-state school, a public or private college, a two-year community college program or a four-year university program. Students can attend full-time and have a bachelor of arts degree by the age of twenty-three or mix college and work, progressing toward a degree more slowly. To make matters more complicated, the array of financial aid available is more complex than ever. Students and their families must weigh federal grants, state merit scholarships, college tax credits, and college savings accounts, just to name a few. In *College Choices*, Caroline Hoxby and a distinguished group of economists show how students and their families really make college decisions—how they respond to financial aid options, how peer relationships figure in the decision-making process, and even whether they need mentoring to get through the admissions process. Students of all sorts are considered—from poor students, who may struggle with applications and whether to continue on to college, to high aptitude students who are offered "free rides" at elite schools. *College Choices* utilizes the best methods and latest data to analyze the college decision-making process, while explaining how changes in aid and admissions practices inform those decisions as well.

The best-selling author of *How Children Succeed* returns with a powerful, mind-changing inquiry into higher education in the United States. Does college still work? Is the system designed just to protect the privileged and leave everyone else behind? Or can a college education today provide real opportunity to young Americans seeking to improve their station in life? *The Years That Matter Most* tells the stories of students trying to find their way, with hope, joy, and frustration, through the application process and into college. Drawing on new research, the book reveals how the landscape of higher education has shifted in recent decades and exposes the hidden truths of how the system works and whom it works for. And it introduces us to the people who really make higher education go: admissions directors trying to balance the class and balance the budget, College Board officials scrambling to defend the SAT in the face of mounting evidence that it favors the wealthy, researchers working to unlock the mysteries of the college-student brain, and educators trying to transform potential dropouts into successful graduates. With insight, humor, and passion, Paul Tough takes readers on a journey from Ivy League seminar rooms to community college welding shops, from giant public flagship universities to tiny experimental storefront colleges. Whether you are facing your own decision about college or simply care about the American promise of social mobility, *The Years That Matter Most* will change the way you think--not just about higher education, but about the nation itself.
