This complete and simplified guide to configuration and business processes for SAP Product Costing covers: * Introduction to Value Flows in SAP Controlling * Step-by-Step Examples * Configuration for Product Costing * Detailed Month End Closing Processes

SAP is the world leader in Enterprise Resource Planning (ERP) software; of the software's modules, the FI (Finance) and CO (Controlling) are by far the most popular and are widely implemented. This book has no competition—it is the only book on the market on how to configure and implement SAP's FI and CO modules to maximize functionality and features hands-on, step-by-step instructions and real-world examples that provide immediate and practical solutions. Updated for SAP's ECC 6.0, the book covers FI enterprise structure, general ledger, substitutions and validations, automatic account assignments, accounts payable and receivable, asset accounting, accrual engine, closing entries, credit management, lockbox, CO enterprise structure, profitability analysis (CO-PA), and more.

SAP ERP modules are notoriously hard to configure and use effectively without a lot of practice and experience. But as SAP ERP Financial Accounting and Controlling: Configuration and Use Management shows, it doesn't have to be so difficult. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step through configuring and using all the program's facets. This approach makes configuration complexities manageable. The book's author—SAP expert, trainer, and accountant Andrew Okungbowa—ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. SAP ERP Financial Accounting and Controlling: Configuration and Use Management is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work—even when the finances are complicated, such as with the ins and outs of taxes, currency conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both configuration and end user procedures, the book covers most aspects of the SAP FICO certification syllabus—SAP's

Access Free Controlling With Sap Practical Guide

view of the module's key tasks and procedures—including: Configuring and using the general ledger and accounts payable and receivable screens Configuring and completing closing procedures, asset accounting, and financial reporting Configuring global settings and enterprise variables Accounting for both profit and cost centers Creating a house bank Integrating FICO with other SAP modules Taking a jargon-free tone and providing an abundance of examples, Andrew Okungbowa provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO.

This book offers a comprehensive introduction to SAP ERP Controlling (CO). You will learn the basic fundamentals of the organizational structure, master data, and functions of SAP Controlling, including overhead controlling, product costing, month-end closing, and reporting. If you would like to understand the basic fundamentals of SAP Controlling, with examples based on a case study approach, this book is for you! Using a fictional chocolate manufacturing company case study, you will learn fundamentals based on several day-in-the-life scenarios of various key functions such as cost planning, production controlling, actual costing, and information systems. Get detailed information on how SAP CO integrates with other SAP modules and obtain insight into the different functional areas typically used in manufacturing organizations. Dive into SAP ERP master data elements and get tips on how to maintain consistent and accurate data. Review the various planning methods available and get an overview of cost center planning, including overhead planning and labor cost planning. Understand how SAP Material Ledger can be used to accurately determine costs. Identify how actual costs are booked and absorbed. By using a detailed case study, practical examples, tips, and screenshots the author brings readers new to SAP CO quickly up to speed on the fundamentals. - Cost center and product cost planning, actual cost flow - Best practices for cost absorption using Product Cost Controlling - Month-end closing activities in SAP Controlling - Examples and screenshots based on a case study approach

This SAP Controlling (CO) book walks readers through the fundamentals of internal orders in SAP ERP as cost objects, as well as the benefits of period settlement. Dive into master data configuration for creating orders types and status management and learn how to create a master record. Get step-by-step guidance on how to do daily postings in internal orders with and without revenue and learn how to use commitments. Obtain expert advice on period-end close, including the settlement profile, allocation structure, source structure, and results analysis. Find out what your SAP reporting options are and learn how to leverage summarization hierarchies in SAP CO. By using practical examples, and SAP screenshots, the author brings business users new to internal orders up to speed on the fundamentals. Experienced SAP users will benefit from the expert tips and configuration requirements. - Concepts and daily postings to internal orders - Master data configuration -
