This is the inside story of private equity dealmaking. Over the last 40 years, LBO fund managers have demonstrated that they are good at making money for themselves and their investors. But when one looks beneath the surface of the transactions they engineer, it is apparent that these deals can, at times, go spectacularly wrong. Through 14 business stories, all emanating from the noughties' credit bubble and including headline-grabbing names like Caesars, Debenhams, EMI, Hertz, Seat Pagine Gialle and TXU, The Debt Trap shows how, via controversial practices like quick flips, repeat dividend recaps, heavy cost-cutting and asset-stripping, leveraged buyouts changed, for better or for worse, the way private companies are financed and managed today. From technological disruption in the worlds of music recording and business-directory publishing to economic turbulence in the gambling, real estate and energy sectors, highly levered corporations are often incapable of handling market corrections when debt commitments start piling up. Behind the historical events and the financial empires erected by some of the elite private equity specialists, these 14 in-depth case studies examine how value-maximising techniques and a short-cut mentality can impact investment returns and portfolio assets. Whether you are a PE practitioner, investor, business manager, academic or business student, you will find The Debt Trap to be an authoritative and fascinating account.

Beating the College Debt Trap presents students with a better way to do college. The radically counter-cultural truth is that students don ' t have to be totally dependent on Mom, Dad, or Uncle Sam to get the most out of college. Graduation on a solid financial foundation is possible. But it will require intentionality, creativity, hard work, and a willingness to delay gratification. Chediak gets into the nitty-gritty of how to get work and make money during the college years, pay off any loans quickly, spend less, save more, and stay out of debt for good. He also unpacks how to transition from college into career, honor God while achieving financial independence, and use your finances to make a positive, eternally-significant difference in the lives of others. As a young engineering professor with an aptitude for finances and money management, Chediak has become particularly concerned with the financial health of young adults, especially in light of the ever increasing costs of college. In Beating the College Debt Trap he helps do something about this problem. He engages, in a friendly manner, the " real world " financial issues that 17-25 year olds face, with clarity, practical help, lots of illustrations, and a little humor, while conveying a distinctly Christian perspective.

"Student loan debt in the U.S. now exceeds \$1 trillion, more than the nation's credit-card debt. This timely book explains how and why student loans evolved, the concerns they've raised along the way, and how each policy designed to fix student loans winds up making things worse. The authors, a father and son team, provide an intergenerational, interdisciplinary approach to understanding how, over the last 70 years, Americans incrementally, with the best intentions, created our current student loan disaster. They examine the competing interests and shifting societal expectations that contributed to the problem, and offer recommendations for confronting the larger problem of college costs and student borrowing in the future"--

College tuition and student debt levels have been rising at an alarming pace for at least two decades. These trends, coupled with an economy weakened by a major recession, have raised serious questions about whether we are headed for a major crisis, with borrowers defaulting on their loans in unprecedented numbers and taxpayers being forced to foot the bill. Game of Loans draws on new evidence to explain why such fears are misplaced—and how the popular myth of a looming crisis has

obscured the real problems facing student lending in America. Bringing needed clarity to an issue that concerns all of us, Beth Akers and Matthew Chingos cut through the sensationalism and misleading rhetoric to make the compelling case that college remains a good investment for most students. They show how, in fact, typical borrowers face affordable debt burdens, and argue that the truly serious cases of financial hardship portrayed in the media are less common than the popular narrative would have us believe. But there are more troubling problems with student loans that don't receive the same attention. They include high rates of avoidable defaults by students who take on loans but don't finish college—the riskiest segment of borrowers—and a dysfunctional market where competition among colleges drives tuition costs up instead of down. Persuasive and compelling, *Game of Loans* moves beyond the emotionally charged and politicized talk surrounding student debt, and offers a set of sensible policy proposals that can solve the real problems in student lending.

Credit and debt appear to be natural, permanent facets of Americans' lives, but a debt-based economy and debt-financed lifestyles are actually recent inventions. In 1951 Diners Club issued a plastic card that enabled patrons to pay for their meals at select New York City restaurants at the end of each month. Soon other "charge cards" (as they were then known) offered the convenience for travelers throughout the United States to pay for hotels, food, and entertainment on credit. In the 1970s the advent of computers and the deregulation of banking created an explosion in credit card use—and consumer debt. With gigantic national banks and computer systems that allowed variable interest rates, consumer screening, mass mailings, and methods to discipline slow payers with penalties and fees, middle-class Americans experienced a sea change in their lives. Given the enormous profits from issuing credit, banks and chain stores used aggressive marketing to reach Americans experiencing such crises as divorce or unemployment, to help them make ends meet or to persuade them that they could live beyond their means. After banks exhausted the profits from this group of people, they moved into the market for college credit cards and student loans and then into predatory lending (through check-cashing stores and pawnshops) to the poor. In 2003, Americans owed nearly \$8 trillion in consumer debt, amounting to 130 percent of their average disposable income. The role of credit and debt in people's lives is one of the most important social and economic issues of our age. Brett Williams provides a sobering and frank investigation of the credit industry and how it came to dominate the lives of most Americans by propelling the social changes that are enacted when an economy is based on debt. Williams argues that credit and debt act to obscure, reproduce, and exacerbate other inequalities. It is in the best interest of the banks, corporations, and their shareholders to keep consumer debt at high levels. By targeting low-income and young people who would not be eligible for credit in other businesses, these companies are able quickly to gain a stranglehold on the finances of millions. Throughout, Williams provides firsthand accounts of how Americans from all socioeconomic levels use credit. These vignettes complement the history and technical issues of the credit industry, including strategies people use to manage debt, how credit functions in their lives, how they understand their own indebtedness, and the sometimes tragic impact of massive debt on people's lives.

Student debt is a form of debt that is owed by an attending, formerly withdrawn, or graduated student to a lending institution, or a financial institution. The lent amount, often referred to as a student loan or the debts may be owed to the school (or the bank) if the student has dropped classes and withdrawn from the school, or if the student has graduated but is underemployed. The \$1.2 Trillion student loan debt crisis is hurting the American economy. Parents and students sign for student loans unaware of the effect it can have on their financial future. This book will help you understand student loans and how to get out of debt and show you how student loans affect your credit score and how you can improve your score.

Every parent wants the best for their child. That's why they send them to college! But most parents struggle to pay for school and end up turning to student loans. That's why the majority of graduates walk away with \$35,000 in student loan debt and no clue what that debt will really cost them.<sup>1</sup> Student loan debt doesn't open doors for young adults—it closes them. They postpone getting married and starting a family. That debt even takes away their freedom to pursue their dreams. But there is a different way. Going to college without student loans is possible! In *Debt-Free Degree*, Anthony O'Neal teaches parents how to get their child through school without debt, even if they haven't saved for it. He also shows parents: \*How to prepare their child for college \*Which classes to take in high school \*How and when to take the ACT and SAT \*The right way to do college visits \*How to choose a major A college education is supposed to prepare a graduate for their future, not rob them of their paycheck and freedom for decades. *Debt-Free Degree* shows parents how to pay cash for college and set their child up to succeed for life.

What is life like for families who are stuck in problem debt? Why do they fall into a spiral of debt in the first place, and why is it so hard to escape? The first hand stories in this book offer a unique understanding of life for families and children fighting a daily battle against poverty and debt. They give voice to some of the most underrepresented people in society, who are too often portrayed cruelly in the media and elsewhere. Drawing on research data collected through The Children's Society's campaign *The Debt Trap*, this book explores the causes, implications and impacts of problem debt, challenges pejorative public attitudes and encourages more compassionate policy-making to help families escape poverty and debt.
