Most of us have been perplexed by a strange sense of familiarity when doing something for the first time. We feel that we have been here before, or done this before, but know for sure that this is impossible. In fact, according to numerous surveys, about two-thirds of us have experienced déjà vu at

least once, and most of us have had multiple experiences. There are a number of credible scientific interpretations of déjà vu, and this book summarizes the broad range of published work from philosophy, religion, neurology, sociology, memory, perception, psychopathology, and psychopharmacology. This book also includes discussion of cognitive functioning in retrieval and familiarity, neuronal transmission, and double perception during the déjà vu experience.

Déjà vu, which doubles and confuses our experience of time, is a psychological

phenomenon with peculiar relevance to our contemporary historical circumstances. From this starting point, the acclaimed Italian philosopher Paolo Virno examines the construct of memory, the passage of time, and the “end of history.” Through thinkers such as Bergson, Kojève and Nietzsche, Virno shows how our perception of history can become suspended or paralysed, making the distinction between “before” and “after,” cause and effect, seem derisory. In examining the way the experience of time becomes historical, Virno forms a radical new theory of historical temporality.

English poetry has seen a lot of transformation, growth and nourishment in its journey to the 21st century. The aura and aroma though are evergreen as if ensuring that the soul of the poetry is unhurt, cared and caressed in the same legendary manner. Emotions, ambitions, inspirations and realisations are embedded over human existence only to make it the most natural event of the universe as rendered by The Almighty. This book is a treasure for anyone who looks for things to relate. It reintroduces you to a thousand aspects of

The pictorial illustrations are impeccable and not only keep the reader engrossed but also speak a lot about the poet's skills.

Déjà vu is one of the most complex and subjective of all memory phenomena. It is an infrequent and striking mental experience, where the feeling of familiarity is combined with the knowledge that this feeling is

false. While until recently it was an aspect of memory largely overlooked by mainstream cognitive psychology, this book brings together the growing scientific literature on déjà vu, making the case for it as a metacognitive phenomenon. The Cognitive Neuropsychology of Déjà Vu reviews clinical, experimental and neuroimaging methods, focusing on how memory disorders and neurological dysfunction relate to the experience. Examining déjà vu as a memory phenomenon, Chris Moulin explores how the experience of déjà vu in special populations, such as healthy aging or those with

schizophrenia, provides new insights into understanding this phenomenon. He considers the extensive data on déjà vu in people with epilepsy, dementia and other neurological conditions, assessing neuropsychological theories of déjà vu formation. Essential reading for all students and researchers interested in memory disorders, this valuable book presents the case for déjà vu as a 'healthy' phenomenon only experienced by people with sufficient cognitive resources to oppose and detect the false feeling of familiarity.
