Provides students with an inexpensive note-taking system that contains a reduced copy of every slide in the PowerPoint presentation.

Principles of Corporate Finance is the worldwide leading text that describes the theory and practice of corporate finance. Throughout the book, the authors show how managers use financial theory to solve practical problems and as a way to respond to change by showing not just how, but why companies and management act as they do. This text is a valued reference for thousands of practicing financial managers.

The best-selling Fundamentals of Corporate Finance (FCF) has three basic themes that are the central focus of the book: 1) An emphasis on intuition—the authors separate and explain the principles at work on a common sense, intuitive level before launching into any specifics. 2) A unified valuation approach—net present value (NPV) is treated as the basic concept underlying corporate finance. 3) A managerial focus—the authors emphasize the role of the financial manager as decision maker, and they stress the need for managerial input and judgment. The Eleventh Edition continues the tradition of excellence that has earned Fundamentals of Corporate Finance its status as market leader. McGraw-Hill’s adaptive learning component, LearnSmart, provides assignable modules that help students master chapter core concepts and come to class more prepared. In addition, resources within Connect help students solve financial problems and apply what they’ve learned. Ross Fundamentals’ intuitive approach, managerial focus, and strong end-of-chapter content combine with a complete digital solution to help your students achieve higher outcomes in the course.

Anthropology is a disciplined inquiry into the conditions and potentials of human life. Generations of theorists, however, have expunged life from their accounts, treating it as the mere output of patterns,

codes, structures or systems variously defined as genetic or cultural, natural or social. Building on his classic work *The Perception of the Environment*, Tim Ingold sets out to restore life to where it should belong, at the heart of anthropological concern. *Being Alive* ranges over such themes as the vitality of materials, what it means to make things, the perception and formation of the ground, the mingling of earth and sky in the weather-world, the experiences of light, sound and feeling, the role of storytelling in the integration of knowledge, and the potential of drawing to unite observation and description. Our humanity, Ingold argues, does not come ready-made but is continually fashioned in our movements along ways of life. Starting from the idea of life as a process of wayfaring, Ingold presents a radically new understanding of movement, knowledge and description as dimensions not just of being in the world, but of being alive to what is going on there.

For MBA/graduate students taking a course in corporate finance. Using the unifying valuation framework based on the Law of One Price, top researchers Jonathan Berk and Peter DeMarzo set the new standard for corporate finance textbooks. *Corporate Finance* blends coverage of time-tested principles and the latest advancements with the practical perspective of the financial manager. With this ideal melding of the core with modern topics, innovation with proven pedagogy, Berk and DeMarzo establish the new canon in finance. The second edition reflects the constantly changing world of finance, including information on the recent financial crisis, new behavioral finance research, and updated practitioner interviews.

The Smart Habit Guide is an International Bestseller with over 500 Five-Star Reviews on Amazon and Goodreads, across four translations. Think Smarter. Work Smarter. Be Smarter. Imagine if there was a secret that all of the smart people in the world were keeping from you. And this meant that they always had an advantage. Really, there isn't just one secret. There are many. They don't keep these secrets on purpose – rather, they are often too busy implementing smart habits to talk about them. These are powerful habits. They drive us to improve our abilities and succeed. Internationally bestselling author I. C. Robledo has studied the lives of highly intelligent people for many years. He has concluded that smart people are not born smart. Instead, they acquire habits that keep the brain in top shape. Inside, you will discover: - How putting household items in unexpected places can benefit your memory - How to conduct a thought experiment – a tool often used by Einstein - Why teaching helps you learn, even if you think you know the material - How smart people search deeply for answers, examining details thoroughly - Why great thinkers document their thought processes Get smarter by making small life changes with *The Smart Habit Guide*. Pick up your copy today by scrolling to the top of the page and clicking BUY NOW.
