Applied Linguistics and Language Teacher Education is aimed at applied linguists who are interested in understanding more about the learning of novice teachers in their classes. The 21 studies in this volume provide information on the complexity of novice teachers learning and use of knowledge in a variety of applied linguistics classes such as SLA, Syntax, Pragmatics, Sociolinguistics, Phonetics and Phonology, L2 Reading and Writing, Testing, and Content Based Instruction. These studies were conducted in a variety of contexts, from North and South America to Europe, Asia and Australia, and look at the preparation of teachers of English, Spanish and Chinese. The book also includes a state-of-the-art summary of research on knowledge acquisition and use which provides applied linguists with a solid basis for developing their ideas about their students learning and use of the knowledge presented in their classes.

This collection brings together research on learning-oriented language assessment from scholars working across geographic and educational contexts, highlighting the opportunities of assessment practices which seek to better align assessment and learning tasks and support effective learning. The volume begins by introducing learning-oriented assessment (LOA) and the context around its growing popularity, especially in accountability-oriented settings which favor summative large-scale tests. The first part of the book charts the development of LOA 's theoretical and conceptual underpinnings, outlining the ways in which they have been informed by theories of learning and key elements. The second part demonstrates LOA in practice, drawing on examples from different countries and instructional settings to explore such topics as the role of technology in LOA and developing feedback materials based around LOA principles and developed for core literacy skills. Offering a holistic view of learning-oriented assessment and the real-world affordances and challenges of its implementation, this book is key reading for graduate students, researchers, and practitioners in language testing and assessment, TESOL, and language education.

Tests in Education: A Book of Critical Reviews is a collection of reviews of tests used in education. Topics covered by the reviews include early development, language, mathematics, composite attainments, general abilities, and personality and counseling. In the introduction, the tests reviewed, their range, and their accessibility and availability are discussed, along with the issues taken into account by the reviewers in the preparation of their reviews. Some of the desiderata for published tests are considered and the principles and issues frequently referred to by the reviewers are highlighted. The next section is devoted to the test reviews, which cover early development, language, mathematics, composite attainments, general abilities, and personality and counseling. The final chapter focuses on a number of other reviews for tests such as the Comprehension Test for College of Education Students, Garnett College Test, Maitland Graves Design Judgement Test, The Meier Art Tests, Modern Language Aptitude Test, Seashore Measure of Musical Talents, and Wing Standardized Tests of Musical Intelligence. This monograph will be of value to a wide range of professionals, including teachers, higher administrative staff and educational advisers, educational psychologists, medical officers, speech therapists, pediatricians, psychiatrists, and social workers.

Prepare for the Common Core Grade 6 Math test with a perfect practice book! The surest way to practice your Common Core Math test-taking skills is with simulated exams. This book contains 12 chapters with original and innovative research studies in the issues related to the broadly defined creep effect, which concerns not only the area of construction materials but also natural phenomena. The emphasis on the discussion of a new trend of experimental creep testing, which binds the classic creep methods to seek the correlation of parameters obtained in tests, deserves particular attention. This book aims to provide the readers, including, but not limited to, students and doctoral students and also the research personnel and engineers involved in the operation of equipment and structural components as well as specialists in high-temperature creep-resisting materials, with a comprehensive review of new trends in the field of creep-exposed materials and their research methodology. The chapters of this book were developed by respected and well-known researchers from different countries.

The book "India & World Panorama for Competitive Exams" contains specific topics in General Knowledge which form a part of most of the Competitive Exams. The book contains to the point theory in all the chapters followed by an exercise with detailed solutions. The theory covers tables, charts and a lot of information about INdia and the World. The book also covers detailed information on Art and Culture, Sports and Games & Awards and Honours apt for these exams. The book covers a lot of questions from the past competitive exams. The book is a MUST for all SSC/ Banking/ Railways/ Defense/ Insurance Exam aspirants.
