THE NUMBER 1 SUNDAY TIMES BESTSELLER AND RICHARD & JUDY BOOK CLUB 2017 PICK A new Sunday Times bestseller from Bryony Gordon, Telegraph columnist and author of the bestselling *The Wrong Knickers*. For readers who enjoyed Matt Haig's *Reasons to Stay Alive* and Ruby Wax's *Sane New World*, *Mad Girl* is a shocking, funny, unpredictable, heart-wrenching, raw and jaw-droppingly truthful celebration of life with mental illness. 'I loved it. A brilliant fast and funny and frank look at something that absolutely needs to be talked about in this way' Matt Haig Bryony Gordon has OCD. It's the snake in her brain that has told her ever since she was a teenager that her world is about to come crashing down: that her family might die if she doesn't repeat a phrase 5 times, or that she might have murdered someone and forgotten about it. It's caused alopecia, bulimia, and drug dependency. And Bryony is sick of it. Keeping silent about her illness has given it a cachet it simply does not deserve, so here she shares her story with trademark wit and dazzling honesty. A hugely successful columnist for the Telegraph, a bestselling author, and a happily married mother of an adorable daughter, Bryony has managed to laugh and live well while simultaneously grappling with her illness. Now it's time for her to speak out. Writing with her characteristic warmth and dark humour, Bryony explores her relationship with her OCD and depression as only she can. *Mad Girl* is a shocking, funny, unpredictable, heart-wrenching, raw and jaw-droppingly truthful celebration of life with mental illness.

This controversial new book describes how human behaviour - thoughts, emotions, actions and mental health - can be largely explained if we understand how people make sense of their world and how that framework of understanding has been learned. In this ground-breaking book, Peter Kinderman, presents a simple, but radical new model of mental well-being. Published following the publication of the new edition of the controversial, Diagnostic and Statistical Manual, the author challenges notions such as 'mental illness' and 'abnormal psychology' as old-fashioned, demeaning and invalid, and argues that diagnoses such as 'depression' and 'schizophrenia' are unhelpful. Kinderman argues that one consequence of our current obsession with a medical approach to human well-being and distress, is that human problems are too often merely diagnosed and treated, rather than understood. Witten by an expert in his field, and accessible to all those interested in and affected by mental health issues, *The New Laws of Psychology* will change the way we define mental illness forever.

The role of the dog in human society is the connecting thread that binds the essays in "Canis Africanis," each revealing a different part of the complex social history of southern Africa. The essays

range widely from concerns over disease, bestiality, and social degradation through gambling on dogs to anxieties over social status reflected through breed classifications, and social rebellion through resisting the dog tax imposed by colonial authorities. With its focus on dogs in human history, this project is part of what has been termed the 'animal turn' in the social sciences, which investigates the spaces which animals inhabit in human society and the way in which animal and human lives interconnect, demonstrating how different human groups construct a range of identities for themselves (and for others) in terms of animals. So instead of conceiving of animals as merely constituents of ecological or agricultural systems, they can be comprehended through their role in human cultures.
