supporting other functional areas while fostering an understanding of how financial decisions can create value. Corporate Finance covers areas related to estimating divisional cost of capital; executing a financing strategy; establishing debt and dividend policies consistent with the company's strategy and environment; choosing between dividends and stock repurchases; managing high growth and managing working capital. Its new topics include: - Corporate Financial Flexibility (Real options) - New Financial Instruments - Project Finance - Acquisitions and Control - Performance Measurement and Incentive Compensation The goal of this book is to provide a thorough understanding of how and why firms make their financial decisions the way they do and their impact on shareholder value. The central theme of the book is Value Based Management, which assumes that maximizing shareholder value is the governing objective of a firm. Each chapter of this new edition has detailed and real-life cases to help students easily understand and grasp concepts. The author has also provided the case-map of the Harvard Business School to make this book more user-friendly in classrooms. The inclusion of several new topics/cases, extensive pedagogical tools and a finance-for-non-finance approach make this book ideal for MBA/CA/CFA/ICWA students and executive education programs.

For centuries, experts have argued that learning was about memorizing information: You're supposed to study facts, dates, and details; burn them into your memory; and then apply that knowledge at opportune times. But this approach to learning isn't nearly enough for the world that we live in today, and in *Learn Better* journalist and education researcher Ulrich Boser demonstrates that how we learn can matter just as much as what we learn. In this brilliantly researched book, Boser maps out the new science of learning, showing how simple techniques like comprehension check-ins and making material personally relatable can help people gain expertise in dramatically better ways. He

covers six key steps to help you "learn how to learn," all illuminated with fascinating stories like how Jackson Pollock developed his unique painting style and why an ancient Japanese counting device allows kids to do math at superhuman speeds. Boser's witty, engaging writing makes this book feel like a guilty pleasure, not homework. Learn Better will revolutionize the way students and society alike approach learning and makes the case that being smart is not an innate ability--learning is a skill everyone can master. With Boser as your guide, you will be able to fully capitalize on your brain's remarkable ability to gain new skills and open up a whole new world of possibilities.

In the past few years the market for electric guitar kits and parts has exploded. For every two enthusiasts, there are four opinions on how properly to fill woodgrain. In this book, Will Kelly cuts through all that noise and shows how, with a little patience and some inexpensive tools, the average person can turn a modest investment into a gig-worthy instrument and perhaps even a lifelong hobby. Kelly presents guitar-building in a progressive fashion, beginning with a simple Stratocaster-style kit with a bolt-on neck and continuing on to a "relic'd" Telecaster-style build, two Gibson-style set-neck models, and a custom double-neck mash-up. Because each build is more involved than the previous, the reader builds on his or her skill set and acquires only the tools necessary for the reader's level of interest. Kelly shows how to apply finishes, choose and install hardware, wire electronics, execute the final assembly, and set up the finished guitar for proper action and intonation.

The story behind the bottle, *First Big Crush* is Eric Arnold's wild account of his year immersing himself in all things wine...and somehow not winding up in rehab. Never having held a meaningful job for very long (and getting fired from most of them), Eric Arnold heads to New Zealand -- to Allan Scott Wines -- seeking adventure and hoping to learn a little bit about wine. What could be better than working outside in the fresh air and drinking wine all day? Before he knows it, he is dirty, wet, cold, and at the mercy of a tank of wine that just might explode and take him with it. So begin Eric's adventures in the world of wine. He gets sunburned, sore, and drunk -- and then does it all over again the next day. *First Big Crush* is a story that is as outrageous as it is compelling. Here are tales of first pressings, pruning, and tasting competitions. There are also rowdy nights at the local pub, girls, meat pies, girls, rugby, and tales of hunting wild pig. Along the way, each step of the winemaking process is explained in a way that humans can actually understand. Almost against his will, Eric becomes an expert.
