Geoff Emerick became an assistant engineer at the legendary Abbey Road Studios in 1962 at age fifteen, and was present as a new band called the Beatles recorded their first songs. He later worked with the Beatles as they recorded their singles "She Loves You" and "I Want to Hold Your Hand," the songs that would propel them to international superstardom. In 1964 he would witness the transformation of this young and playful group from Liverpool into professional, polished musicians as they put to tape classic songs such as "Eight Days A Week" and "I Feel Fine." Then, in 1966, at age nineteen, Geoff Emerick became the Beatles' chief engineer, the man responsible for their distinctive sound as they recorded the classic album Revolver, in which they pioneered innovative recording techniques that changed the course of rock history. Emerick would also engineer the monumental Sgt. Pepper and Abbey Road albums, considered by many the greatest rock recordings of all time. In Here, There and Everywhere he reveals the creative process of the band in the studio, and describes how he achieved the sounds on their most famous songs. Emerick also brings to light the personal dynamics of the band, from the relentless (and increasingly mean-spirited) competition between Lennon and McCartney to the infighting and frustration that eventually brought a bitter end to the greatest rock band the world has ever known.

A funny and honest coming-of-age-story about first love and finding yourself. Here, There, Everywhere is perfect for fans of Andrew Smith and Becky Albertalli. Zeus would rather be anywhere than here—Buffalo Falls, the tiny town his family moved to at the end of the school year. Having left all his friends back in Chicago, and with nothing to look forward to except helping out at his mother's café and biking around town with his weird little brother, Zeus is pretty sure this is destined to be the worst summer of his life. But then he meets Rose. Rose is funny, beautiful, smart, and an incredible musician; Zeus can hardly believe that someone like her exists, let alone seems interested in being with him. However, while Zeus is counting down the minutes until he can see her next, Rose is counting down the days until she finds out whether she will be able to leave their small town to pursue her dreams. As the afternoons spent going on local adventures pass into nights discussing their deepest hopes, Zeus knows that he doesn't have long to convince Rose that what they have is more than a summer fling...if only he's brave enough to seize the chance.

Friends Here... There... Everywhere... was written to enhance social and literacy development in young children, ages two to five. Growth occurs at different rates for each child in this very important period of development that occurs rapidly, as they learn to become independent. The book encourages young children to feel secure as they develop, and experience their first encounters of making friends, while they explore the world and continue to become individuals. It is ideal for teachers, parents, and caregivers who wish to discuss how to share and play cooperatively. In addition to the topic of building friendships, this book helps develop recognition of words that are opposites and introduces adverbs (here, there, and everywhere). It can motivate children to inquire about friendships, relate to them, and suggests places to find friends, while strengthening reading and writing skills.

When Roxanne Bonaventure is eleven years old, a dying woman gives her a gift that changes her life utterly, making her a singular creature, with no analogue or equivalent. With the strange device called the "Sofia," she is granted the ability to travel anywhere in space and time, not only through times that were and will be, but also through the worlds that could have been and might someday be. From that day forward, no place or time can contain her, no danger can assail her, no mystery can elude her. From the deepest secrets of the past to the furthest flung visions of the future, Roxanne's life knows no boundaries except those she can imagine. But such power comes at a price: the life she might have led is forever lost to her, twisting away among the infinite threads of the Myriad. Roxanne finds herself isolated, unable to make lasting, meaningful relationships with friends, family, or strangers. Here, There & Everywhere is the story of one woman searching for herself, and for someone with whom to share her life. It is one story, and many stories - the jigsaw puzzle of a life, from youth to old age, projected against the backdrop of everything that ever was, might have been, and may yet be. Roxanne's adventures take her from Victorian England to Ancient Egypt, from the End of Time to the birth of The Beatles. Along the way, she encounters every method of time travel theoretically possible: Visser Wormholes and Tipler Cylinders; a mysterious substance called chronium; and the slow and steady path we all take, moving forward one day at a time. And somewhere in the endlessly splitting paths of the Myriad lies the secret of Roxann
