By any reckoning, the papacy of Pope Benedict XVI was extraordinary, with moments of high drama. Not the least of these was his resignation from office in February 2013, the first papal resignation in 500 years. But who is Joseph Ratzinger? In this definitive biography, based on meticulous historical research and many hours of taped interviews with his subject, Peter Seewald shows the exceptional circumstances in which the exceptionally talented son of a Bavarian policeman became the first German pope for 950 years. In this first volume, covering the years 1927–1965, we witness Joseph Ratzinger's early days, living above his father's police station. Ratzinger came to adulthood through the years of National Socialism. Though hostile to the rise of Hitler, his family knew well about Dachau and Ratzinger himself was conscripted into the Hitler Youth. Joseph Ratzinger proved to be a man of exceptional intellectual gifts and by the time of the Second Vatican Council (1962–1965) he was already noted as one of the outstanding intellects present and was nominated a 'peritus' or theological expert. This was also the time of the start of his friendship with the Swiss theologian Hans Küng who was to become his nemesis. Of his predecessor, Pope Francis has said: 'Pope Benedict was a great Pope, great for the penetration of his intelligence, great for his important contribution to theology, great for his love of the Church and human beings, great for his virtues and faith'. Even in this first volume, we begin to understand how this came to be true.

English is the language of science today. No matter which languages you know, if you want your work seen, studied, and cited, you need to publish in English. But that hasn't always been the case. Though there was a time when Latin dominated the field, for centuries science has been a polyglot enterprise, conducted in a number of languages whose importance waxed and waned over time—until the rise of English in the

twentieth century. So how did we get from there to here? How did French, German, Latin, Russian, and even Esperanto give way to English? And what can we reconstruct of the experience of doing science in the polyglot past? With *Scientific Babel*, Michael D. Gordin resurrects that lost world, in part through an ingenious mechanism: the pages of his highly readable narrative account teem with footnotes—not offering background information, but presenting quoted material in its original language. The result is stunning: as we read about the rise and fall of languages, driven by politics, war, economics, and institutions, we actually see it happen in the ever-changing web of multilingual examples. The history of science, and of English as its dominant language, comes to life, and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices, but also of the possibilities of the polyglot, and the losses that the dominance of English entails. Few historians of science write as well as Gordin, and *Scientific Babel* reveals his incredible command of the literature, language, and intellectual essence of science past and present. No reader who takes this linguistic journey with him will be disappointed.

In this informative and entertaining critique of music in the Catholic Church, Thomas Day outlines a stinging indictment of the influence of popular culture on American Catholicism, particularly as expressed in church music. Taking aim at the Irish-American repertoire of songs that overwhelms Catholic music in America, Day assails the secularization of liturgical practices that began, in the author's view, with the Second Vatican Council in 1962. And while targeting the demise of services, Day remains optimistic, offering several key solutions to revitalize and nurture the latent vitality that remains among the parishioners of the American Catholic Church.

This ground-breaking text explores the intersection between dominant modes of critical educational theory and the socio-political landscape of American Indian education. Grande asserts that, with few exceptions, the matters of Indigenous people and Indian education have been either largely ignored or indiscriminately absorbed within critical theories of education. Furthermore, American Indian scholars and educators have largely resisted engagement with critical educational theory, tending to concentrate instead on the production of historical monographs, ethnographic studies, tribally-centered curricula, and site-based research. Such a focus stems from the fact that most American Indian scholars feel compelled to address the socio-economic urgencies of their own communities, against which engagement in abstract theory appears to be a luxury of the academic elite. While the author acknowledges the dire need for practical-community based research, she maintains that the global encroachment on Indigenous lands, resources, cultures and communities points to the equally urgent need to develop transcendent theories of decolonization and to build broad-based coalitions.

At last, a complete ceremonial manual for the celebration of the Eucharist and the Liturgy of the Hours. Faithful to the renewal of worship authorized by the Second Vatican Council, Ceremonies combines precise guidance to these rites with a pastoral and spiritual approach. A high ideal of noble Catholic worship is consistently maintained, respecting the "continuity of our tradition". Ceremonies sets out the liturgical duties of bishops, priests and deacons, acolytes and servers, lectors and eucharistic ministers etc., hence it is invaluable for clergy and seminarians and all who teach or study the liturgy. Ceremonies includes a wide range of guidance on such useful themes as: vessels and vestments, how to carry out ceremonial actions, the deacon, ministering the Eucharist to the sick, children's liturgy, Eucharistic adoration, Eucharistic processions, celebrating vespers in a parish, eucharistic ministries and the laity, the location of the tabernacle, etc. However, Ceremonies is primarily a book to be used; a practical manual for clergy, MC's, sacristans, liturgical committees and all planning worship in parishes. "Ceremonies is a timely work. It corrects mistaken interpretations with precise guidance and reasoned arguments. It also provides rapid access to official sources." -Msgr. Peter Elliott

A collection of preludes, interludes, and postludes compiled and arranged by Carlo Rossini for pipe or reed organ with Hammond registration. The Liturgical Organist provides the average organist with an orderly collection of liturgical compositions for church use and for possible performance even on the smallest pipe-organ or reed-organ.

Disturbed by the direction in which the post Vatican II liturgical reforms have moved, two fictitious representatives of mutually antagonistic movements debate the remedy for "correct" liturgical reform. This unique work presents a debate between a "traditionalist" who argues for a return to the pre-Vatican II liturgy, and a "reformist" (no liberal himself) who advocates a new liturgical reform more in keeping with what the Council fathers had in mind. They bring to the debate the insights of renowned authorities on the liturgy, including Cardinal Ratzinger, Msgr. Klaus Gamber, Michael Davies, Fr. Brian Harrison and Fr. Aidan Nichols. This book is written for anyone interested in the Church's liturgy, and the controversies surrounding the liturgical renewal. It is both a primer for those who lack the theological and liturgical expertise to articulate their dissatisfaction with the state of the liturgy, and an excellent resource for those specialists who would appreciate having a single volume for consulting salient points from numerous authorities.
