PQA is a validated assessment tool to evaluate the quality of youth programs and identify staff development needs.

The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

Every day, 250 children are suspended from school. Many are children of color, deprived of opportunities to experience learning at the same rate and quality as white children. Many families don't feel heard or respected in their child's schools. *Don't Look Away: Embracing Anti-Bias Classrooms* leads early childhood professionals to explore and address issues of bias, equity, low expectations, and family engagement to ensure culturally responsive experiences. Importantly, this book will challenge you to consider your perceptions and thought processes: Identify your own unconscious biases—we all have them! Recognize and minimize bias in the classroom, school, and community Connect with children and their families Help close the opportunity gap for children from marginalized communities This book offers strategies, tools, and information to help you create a culturally responsive and equitable learning environment.

High/Scope preschool curriculum is a model for developing high-quality early childhood programs that encourage and support children's initiatives and active learning experiences. This revised manual for early childhood practitioners and students presents essential strategies adults can use to make active learning a reality in their programs. The guide's introduction describes the origin of the High/Scope preschool approach, its basic principles, and its effectiveness for children, families, and society. Part 1 of the guide analyzes the core idea in the development of the High/Scope curriculum—active learning. The concept of active learning is discussed in several contexts: as an essential ingredient for learning, as a basis for how adults can create a supportive social climate, and as a foundation for working with the families or working as a team to make the active learning process effective in a particular setting with a particular group of children. Part 2 discusses methods for creating an environment that promotes active learning. This section suggests selecting and arranging materials from which children can choose, and manipulating and developing the daily routine so children have many opportunities to initiate, plan, carry out, and discuss their actions and ideas. Part 3 introduces 58 key experiences that can guide adults as they plan activities to support development in creative representation, language and literacy, initiative and social relations, movement, music, classification, seriation, number, space, and time. This revised edition of the guide includes information on phonemic awareness and preschool reading, additional references, the latest Perry Preschool research results, recent research relating to brain development, and a complete description of a consistent approach to problem solving. Each chapter includes a list of references and related readings. (HTH)

Clearly babies come into the world remarkably receptive to its wonders. Their alertness to sights, sounds, and even abstract concepts makes them inquisitive explorers—and learners—every waking minute. Well before formal schooling begins, children's early experiences lay the foundations for their later social behavior, emotional regulation, and literacy. Yet, for a variety of reasons, far too little attention is given to the quality of these crucial years. Outmoded theories, outdated facts, and undersized budgets all play a part in the uneven quality of early childhood programs throughout our country. What will it take to provide better early education and care for our children between the ages of two and five? *Eager to Learn* explores this crucial question, synthesizing the newest research findings on how young children learn and the impact of early learning. Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators: findings about the interplay of biology and environment, variations in learning among individuals and children from different social and economic groups, and the importance of health, safety, nutrition and interpersonal warmth to early learning. Perhaps most significant, the book documents how very early in life learning really begins. Valuable conclusions and recommendations are presented in the areas of the

teacher-child relationship, the organization and content of curriculum, meeting the needs of those children most at risk of school failure, teacher preparation, assessment of teaching and learning, and more. The book discusses: Evidence for competing theories, models, and approaches in the field and a hard look at some day-to-day practices and activities generally used in preschool. The role of the teacher, the importance of peer interactions, and other relationships in the child's life. Learning needs of minority children, children with disabilities, and other special groups. Approaches to assessing young children's learning for the purposes of policy decisions, diagnosis of educational difficulties, and instructional planning. Preparation and continuing development of teachers. Eager to Learn presents a comprehensive, coherent picture of early childhood learning, along with a clear path toward improving this important stage of life for all children.

Understanding the HighScope Approach is a much-needed source of information for those wishing to extend and consolidate their understanding of this innovative education programme. It will enable the reader to analyse the essential elements of the HighScope approach to early childhood and its relationship to high-quality early years practice. This second edition contains all the original content, which covers all areas of the curriculum including learning environment, plan-do-review, adult-child interaction and assessment, but has been updated to be fully in line with the latest changes to research, policy and practice. New topics and features include: ? outdoor play and learning ? using the HighScope approach with children with special needs and who speak English as an additional language ? managing the approach with bigger class sizes ??the implementation of technology with children in HighScope settings ? a selection of new photographs Written to support the work of all those in the field of early years education and childcare, this is a vital text for students, early years and childcare practitioners, teachers, early years professionals, children's centre professionals, lecturers, advisory teachers, head teachers and setting managers.

The High/Scope Curriculum is a developmentally based approach to early childhood education. This curriculum's "Extensions" newsletter, in which the articles in this collection first appeared, informs curriculum users about new development, relating to the High/Scope "open framework" curriculum. This collection divides the articles into eight chapters. Chapter 1, "Supportive Adult-Child Interaction," includes articles on encouraging group problem solving, rules and limits, persona dolls as discussion starters, and superhero play. Chapter 2, "Materials and Environments for Active Learners," considers computer use, materials for infants and toddlers, and gardening. Chapter 3, "Learning and Exploring throughout the Daily Routine," presents articles on arrivals and departures for infants and toddlers, reading throughout routines, small group interaction strategies, and pretend play. Chapter 4, "Key Experiences in the Preschool Classroom," contains articles on reading, message boards, promoting outdoor experiences, children's art, dramatic arts, and movement. Chapter 5, "Meeting the Needs of All Children," presents articles on supporting children's home language, classroom adaptations for children with special needs, and High/Scope strategies for specific disabilities. Chapter 6, "Active Learning in the Elementary Grades," focuses on hands-on materials, children's interests, drama, art, and parent-teacher conferences. Chapter 7, "Collaborating with Parents," includes articles on parent involvement opportunities, parent conferences, and involving parents in curriculum planning. Chapter 8, "Team Planning, Assessment, and Staff Development," contains articles on planning around children's interests, assessing program quality through classroom observations, and mentoring. Appended is a list of books and audiovisual material published by the High/Scope Press. (KB)
