Home is Where One Starts... is a short, first-person exploration game in the same vein as Dear Esther or Gone Home. It's an experience where every object has been carefully placed to tell a poignant story—a story about childhood, hope, and the miracle of memory. You play as a little girl from a broken home somewhere in the American South.

"Home means a future. Once we had a stable home, we could think beyond where we were going to live from week to week, and we could begin to look ahead to where we wanted to go. Home is the base where everything begins." - Kelly

This collection brings together some of psychoanalyst D.W. Winnicott's most important work contributing to our understanding of the minds of children. The essays range in topic from 'The Concept of a Healthy Individual' and 'The Value of Depression' to 'Delinquency as a sign of Hope'. All reveal Winnicott's vision of the ways in which the developing self interacts with the family and the larger society.

One of the most gifted and creative psychoanalysts of his generation, D. W. Winnicott made lasting contributions to our understanding of the minds of children. His ideas have influenced the diverse pyschoanalytic schools of Anna Freud, Melanie Klein, and Hans Kohut. But his reach extends far beyond professional circles: his talks to general audiences over the years won him enormous numbers of followers among parents and teachers who have found his observations rich in penetrating insight. This collection brings together many of Winnicott's most important pieces, including previously unpublished talks and several essays from books and journals now difficult to obtain. They range widely in topic--from "The Concept of a Healthy Individual" and "The Value of Depression" to "Delinquency as a Sign of Hope"--and elucidate some of Winnicott's seminal ideas, such as the "transitional object" and the concept of false self. All convey Winnicott's vision of the ways in which the developing self interacts with the family and the larger society.

The former editor in chief of the acclaimed magazine Christianity Today offers a compelling look at the state of evangelicalism and hope for the future. In arguably one of the most divisive and polarizing eras, evangelicals are faced with a profound crisis of confidence. It is a crisis that has many dimensions--political, biblical, and theological--as well as a crisis of spiritual formation and discipleship. What ultimately is at the root of this crisis? Mark Galli encourages us to turn our attention away from the politics of the moment, the social issues being discussed online, and the debate du jour among Christians. He asks us instead to take a long and hard look at what's missing in our spirituality. In an incisive and thought-provoking book, Mark Galli helps us slow down and spend time reflecting on our ultimate priority. A must-read for anyone interested in contemplating the future of the church.

Timber Home Living introduces and showcases the beauty and efficiency of timber homes to an eager custom home buying audience. The magazine's inspiring photography, informative editorial, quality advertising and essential resources involves and encourages readers to pursue their dream home.

The universally acclaimed debut novel. "Extraordinary . . . a spare, futuristic fable about a brand-new mother navigating a flooded world."--Vogue.com Pre-empted by publishers around the world within days of the 2016 London Book Fair, The End We Start From heralds the arrival of Megan Hunter, a dazzling and unique literary talent. Hunter's debut is a searing original, a modern-day parable of rebirth and renewal, of maternal bonds, and the instinct to survive and thrive in the absence of all that's familiar. As London is submerged below flood waters, a woman gives birth to her first child, 2. Days later, she and her baby are forced to leave their home in search of safety. They head north through a newly dangerous country seeking refuge from place to place, shelter to shelter, to a desolate island and back again. The story traces fear and wonder, as the baby's small fists grasp at the first colors he sees, as he grows and stretches, thriving and content against all the odds. Written with poise and poeticism, The End We Start From is an indelible and elemental first book--a lyrical vision of the strangeness and beauty of new motherhood, and a portentous tale of endurance in the face of un governable change. "Strange and powerful, and very apt for these uncertain times. I was moved, terrified, uplifted--sometimes all three at once. It takes skill to manage that, and Hunter has a poet's understanding of how to make each word count."--Tracy Chevalier, New York Times bestselling author of The Girl with a Pearl Earring

Human Rights and the Body is a response to the crisis in human rights, to the very real concern that without a secure foundation for the concept of human rights, their very existence is threatened. While there has been consideration of the discourses of human rights and the way in which the body is written upon, research in linguistics has not yet been fully brought to bear on either human rights or the body. Drawing on legal concepts and aspects of the law of human rights, Mooney aims to provide a universally defensible set of human rights and a foundation, or rather a frame, for them. She argues that the proper frames for human rights are firstly the human body, seen as an index reliant on the natural world, secondly the globe and finally, language. These three frames generate rights to food, water, sleep and shelter, environmental protection and a right against dehumanization. This book is essential reading for researchers and graduate students in the fields of human rights and semiotics of law.
