In the fall of 1930, David Packard left his hometown of Pueblo, Colorado, to enroll at Stanford University, where he befriended another freshman, Bill Hewlett. After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has produced thousands of innovative products for millions of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard and Hewlett wanted more than profits, revenue growth and a constant stream

of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago.

YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . From the Book - Preface: This manual has been compiled to provide time frames, labor crews and equipment spreads to assist the estimator in capsulizing an estimate for the installation of cross-country pipelines, marshland pipelines, nearshore and surf zone pipelines, submerged pipelines, wharfs, jetties, dock facilities, single-point morring terminals, offshore drilling and production platforms and equipment and appurtenances installed thereon. The time frames and

labor and equipment spreads which appear throughout this manual are the result of many time and method studies conducted under varied conditions and at locations throughout the world; these time frames and labor and equipment spreads reflect a complete, unbiased view of all operations involved. When one is engaged in compiling an estimate from any information furnished by others, as is the case with this manual, he should view it in an objective light, giving due consideration to the nature of the project at hand and evaluating all items that may affect the productivity of labor and all other elements involved.

Originally published in 1927 in a small-circulation amateur magazine, spanning the period from antiquity until the 1930s, and covering both the Anglo-American world and Continental Europe, Lovecraft's essay remains unparalleled as a survey of horror literature in our hemisphere. Said literature's emergence as a genre coincided with the institutional establishment of liberalism, which represents a diametrically opposed worldview. This would suggest that horror literature, even if inadvertently or subconsciously, represents an attempt at escaping the limitations of the secular, materialist, rationalist Weltanschauung of liberal modernity, as well as a desire for meaning in a world rendered meaningless through 'liberation' from

hierarchies, folk traditions, the occult, and the supernatural. Also of interest is the fact that the aesthetics of Gothic horror are invariably and luxuriantly beautiful (if in a dark way), whereas the logical extreme of rationality (utilitarianism, standardisation) is inherently anti-aesthetic. Would this not indicate, then, that the Age of Reason marked the beginning of a process that concluded in late modernity with the wholesale destruction of beauty, except where it, or the counterfeiting of it, was dictated by economic necessity? If so, we may view Lovecraft's essay not merely as a resource for those seeking entertainment within a genre of literature, but also a map for those seeking to escape, and begin to transcend, the despair engendered by a worldview that pronounced itself dead when someone spoke of 'the end of history'.
