Designed for the lowest-ability Key Stage 3 students, this English series provides structured coverage of grammar, punctuation, spelling and vocabulary development. For each year there is a student book (of which this one is for Year 9), a pack of eight skills books and a teacher's resource file.

Larson/Edwards' CALCULUS, 11th Edition, expertly combines the printed textbook and technology to deliver everything you need to master the material and pass the class. Stepped-out solution videos with instruction are available at CalcView.com for selected exercises throughout the text, and the website CalcChat.com presents free solutions to all of the odd-numbered exercises in the text. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Watch a video The fiction debut of the New York Times bestselling author of My Fair Lazy. Told in the uproariously entertaining voice readers have come to expect from Jen Lancaster, If You Were Here follows Amish-zombie-teen-romance author Mia and her husband Mac (and their pets) through the alternately frustrating, exciting, terrifying-but always funny-process of buying and renovating their first home in the Chicago suburbs that John Hughes's movies made famous. Along their harrowing renovation journey, Mia and Mac get caught up in various wars with the homeowners' association, meet some less-than-friendly neighbors, and are joined by a hilarious cast of supporting characters, including a celebratad ex-landlady. As they struggle to adapt to their new surroundings- with Mac taking on the renovations himself- Mia and Mac will discover if their marriage is strong enough to survive months of DIY renovations.

Provides an overall introduction to the welding process, illustrating most of the common equipment and work techniques for both the home and shop welding.

Provider-Led Population Health Management: Key Healthcare Strategies in the Cognitive Era, Second Edition draws connections among the new care-delivery models, the components of population health management, and the types of health IT that are required to support those components. The key concept that ties all of this together is that PHM requires a high degree of automation to reach everyone in a population, engage those patients in self-care, and maximize the chance that they will receive the proper preventive, chronic, and acute care. While this book is intended for healthcare executives and policy experts, anyone who is interested in health care can learn something from its exploration of the major issues that are stirring health care today. In the end, the momentous changes going on in health care will affect us all.
