After escaping from death, I lost my true love. Nine years later, after I successfully cultivated and came back for revenge, I fell into a whirlpool of love and a life and death crisis on the first day that I fought with the evil ghost ...

Meet the would-be assassins of class 3-E: Sugino, who let his grades slip and got kicked off the baseball team. Karma, who's doing well in his classes but keeps getting suspended for fighting. The lives of professors and students, deans and presidents, their ideas and idiosyncrasies, their triumphs and failures, provide the driving force of Waite's narrative. Avoiding the details of financing, curriculum, and administration that sometimes dominate institutional histories, Waite focuses on the men and women who were the blood of the university and who established its traditions and ethos. Halifax in peace and war is basic to Dalhousie's history, as is its relations with other colleges and universities in Nova Scotia. Waite sets all this out, placing Dalhousie's development within the larger Nova Scotian context.

Since the early 1890's, children have been taught and encouraged to function as instructional agents for their classroom peers. However, it was not until the last decade that peer-mediated intervention was studied in a rigorous, systematic fashion. The purpose of this edited volume is to provide an up-to-date and complete account of empirical research that addresses the general efficacy of classroom peers as behavior change agents. As a result of various social and legal developments, such as the passage of Public Law 94-142 and its accompanying demand for individualized instruction, peer-mediated interventions seem likely to proliferate. As I have noted elsewhere (Strain, this volume), close adherence to the principle of individualized programming has rendered obsolete the "adults only" model of classroom instruction. Whether the utilization of peers in the instructional process comes to be viewed by school personnel as a positive adjunct to daily classroom practices depends in large measure on our ability to carefully design, conduct, and communicate the findings of applied research. I trust that this volume will function both to accurately communicate existing findings and to stimulate further study. My colleagues who have generously contributed their time and skill to this volume have my deepest appreciation. They have performed their various tasks in a timely, professional manner and, in my opinion, have provided considerable insight into the problems and potentials of peers as instructional agents.
