Answer  
was the author of the American Declaration of Independence? (a) George Washington (b) Thomas Paine (c) Thomas Jefferson

"The Industrial Revolution" (1760-1870) covers the century of extraordinary inventiveness and unprecedented industrial and economic growth which began in mid-18th-century England and spread throughout Europe and the United States. Notable inventions discussed include the steam engine which revolutionized transportation and international commerce and the spinning jenny, which led to the mechanization of textile production and the development of the factory system.

A range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated

# Download Ebook Industrial Revolution Questions And

**Answers**, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future--one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.
