This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

""Thinking contemporary curating' is the first publication to comprehensively explore what is distinctive about contemporary curatorial thought. In five essays, art historian, critic, and theorist Terry Smith surveys the international landscape of current discourse; explores a number of exhibitions that show contemporaneity in present, recent, and post art; describes the enormous growth world-wide of exhibitionary infrastructure and the instability that haunts it; re-examines the phenomenon of artist-curators and curator-artists; and assesses a number of key tendencies in curating - such as the reimagined museum, the expanded exhibition, historicization and recuration, infrastructural activism, and engaged spectatorship - as responses to contemporary conditions." -- book cover.
