"... excellent example... significant contribution... an important interdisciplinary work..." -- Middle East Journal "... an important contribution to aspects of Iranian social communication and interpersonal verbal behavior." -- Language By showing the reader the intricacies of face-to-face sociolinguistic interaction, William Beeman provides a key to understanding Iranian social and political life. Beeman's study in cross-cultural linguistics will clearly be a model for the study of different languages and cultures.

Status and Power in Verbal Interaction is a sociolinguistic study of conversation in a social context. Using an ethnographic methodology and a network analysis of the social roles and relationships in a particular language community, the book explores how speakers negotiate status, relationship, and ultimately contest power through

discourse. Of chief concern to the study is how speakers manage to negotiate relationship roles – which here consists of institutional status as well as the more variable social standing – using conversation. Discourse is seen to be not only what people say, but how they say it – how speakers take the floor, bring new topic to the floor, interrupt each other, and become a resource person in a conversation. The study revolves around the idea that power, while intricately tied to social standing and institutional status, is more than the sum of one's institutional standing, age, education, race and gender. Though these factors convey rank, conversants nonetheless use discourse to jockey for position and contest their relational role vis-a-vis their discourse partners. While institutional standing may be more or less fixed, power of relational roles fluctuates greatly because, as the study shows, power is accorded through a process of ratifying the positive self-image of a speaker. Thus, one's standing in a group is a community negotiation. By investigating power in community at a micro-level of analysis, this study adds a new dimension to existing understandings of power.

and up-to-date introduction to key concepts in sociolinguistics, written in an accessible and engaging style.' Michael Pearce, University of Sunderland, UK 'This is, without a doubt, the most engaging and accessible introduction to the social and political dimensions of language use available.' Brenda Farnell, University of Illinois at Urbana-Champaign, USA Language, Society and Power is the essential introductory text for students studying language in a variety of social contexts. It seeks to answer such questions as: How can a language reflect the status of children and older people? Do men and women talk differently? How can our use of language mark our ethnic identity? It also looks at language use in politics and the media and investigates how language affects and constructs our identities, exploring notions of correctness and attitudes towards language use. While it can be used as a stand-alone text, this edition of Language, Society and Power has also been fully cross-referenced with the new companion title: The Language, Society and Power Reader. Together these books provide the complete resource for students of English language and linguistics, media, communication, cultural studies, sociology and psychology.

This book is a closely-observed anthropological study of life in two small Javanese towns and, at the same time, it attempts a general analysis on sociological lines of some key characteristics of contemporary Javanese society. In particular, the author's examination of the manner in which a pre-existing authoritarian system is being adapted to republican institutions grounded in democratic ideas helps us to understand many of Indonesia's present-day social and political problems.

Language, Society and Power explores the extent to which language reflects and creates our perception of the world, and who makes decisions about what is appropriate language to use. Written in a lively and accessible way, each chapter provides a core introduction to a particular social or political issue in language study, such as ethnicity, gender, class, age, identity, the standard English debate, politics, and the media. The book contains numerous exercises, end of chapter summaries and a glossary of key terms. Language, Society and Power encourages the reader to look beyond the role of language as information exchange and to consider the wider issues of the relationship between language and culture. In this sense the book is

highly interdisciplinary and will be essential for students of English language and linguistics from A-level upwards, and of great relevance to students of media, communication, and cultural studies, sociology and psychology.

This study concentrates on the paradox that existed in colonial Virginia between the growing ideal of individual rights at the same time the institution of slavery was becoming more rigid and repressive. Thomas Jefferson typified the colonial leader who abhorred the effect of slavery on whites and blacks alike, but who depended on slave labor and saw no easy way to resolve the dilemma.

Sociologists Émile Durkheim, Erving Goffman and Randall Collins broadly suppose that ritual is foundational for social life. By contrast, this book argues that ritual is merely surface, beneath which lie status and power, the behavioral dimensions that drive all social interaction. Status, Power and Ritual Interaction identifies status and power as the twin forces that structure social relations, determine emotions and link individuals to the reference groups that deliver culture and administer preferences, actions, beliefs and ideas. An especially important contention is that allegiance to ideas, even those as fundamental as the belief that $1 + 1 = 2$, is primarily

faithfulness to the reference groups that foster the ideas and not to the ideas themselves. This triggers the counter-intuitive deduction that the self, a concept many sociologists, social psychologists and therapists prize so highly, is feckless and irrelevant. Status-power theory leads also to derivations about motivation, play, humor, sacred symbols, social bonding, creative thought, love and sex and other social involvements now either obscure or misunderstood. Engaging with Durkheim (on collective effervescence), Goffman (on ritual-cum-public order) and Collins (on interaction ritual), this book is richly illustrated with instances of how to examine many central questions about society and social interaction from the status-power perspective. It speaks not only to sociologists, but also to anthropologists, behavioral economists and social and clinical psychologists - to all disciplines that examine or treat of social life.
