Blockchain and cryptocurrencies like Bitcoin have hogged the headlines for a long time. But after the hype and the money, there is a lot of technical work to be done, and developers in particular need to understand in some depth what foundations they are actually building their project on. There is quite a bit of basic to work in the Block chain which we have to understand, and the general security in p2p networking demands of Blockchain, before diving into the first Blockchain project. All these concepts are explained by simple concepts from scratch. Cryptocurrencies and decentralized applications are extremely popular, but not well understood technically, which is
