construction materials and components. It is more comprehensive than its predecessors; it contains more than 1200 specifications used in six types of building:

- Commercial buildings, such as offices
- Educational buildings, such as schools and universities
- Healthcare buildings, such as hospitals
- Retail
- Residential
- Industrial. The

range of PCM-enhanced building products in the process of development as well as examples of whole-building-scale field demonstrations. Further chapters discuss experimental and theoretical analyses (including available software) to determine dynamic thermal and energy performance characteristics of building enclosure
