Includes Part 1, Number 1 & 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - December)

Selected by Choice magazine as an Outstanding Academic Title *Fire in the Plaça* is the first full-length study in English of the Patum, a Corpus Christi fire festival unique to Berga, Catalonia, Spain, celebrated annually since the seventeenth century. Participants in the festival are transformed through drink, sleep deprivation, crowding, constant motion, and the smoke and sparks of close-range firecrackers into passionate members of a precarious body politic. Combining richly layered symbolism with intense bodily expression, the Patum has long served as a grassroots equivalent of grand social theory; it moves from a representation of social divisions to a forcible communion among them. The Patum's dancing effigies—giants, dwarves, Turks and Christian knights, devils and angels, a crowned eagle, and two flaming mule-dragons—have provided local allegories for a long series of political conflicts, but the festival obscures its own messages in smoke and motion to enable a temporary merging of opposites. Activists in the 1970s transition to democracy in Spain took the Patum as a model of how old adversaries might collaborate: it helped to shape the mix of assertiveness in performance and compromise in practice that is typical of contemporary Catalan nationalism. The Patum became a focus of resistance to the Franco regime and drew visitors from all over Catalonia, serving as a rehearsal for the mass protests in Barcelona. Later, it provided the newly autonomous region with a vehicle for integrating immigrants and a vocabulary of belonging, culminating in the Patum-derived devils of the closing ceremonies of the 1992 Olympic games. Today, as mines and factories have closed in Berga, the Patum serves as an arena in which provincial Catalans model their relationship to Barcelona, Europe, and the world, and reflects their ambivalence about the choices open to them. Seeking a third way between tourism and terrorism, provincial towns like Berga show us the future of all local communities under globalization. In collective performances such as the Patum, tensions between cultural and political representation are made visible, and the gap between aspiration and possibility is both bridged and acknowledged. In this exceptionally rich ethnographic study, Dorothy Noyes explores the predicament of provincial communities striving to overcome internal conflict and participate in a wider world.

#1 New York Times Bestseller "Significant...The book is both instructive and surprisingly moving." "The New York Times Ray Dalio, one of the world's most successful investors and entrepreneurs, shares the unconventional principles that he's developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine. Dalio himself has been named to Time magazine's list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater's exceptionally effective culture, which he describes as "an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency." It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In *Principles*, Dalio shares what he's learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book's hundreds of practical lessons, which are built around his cornerstones of "radical truth" and "radical transparency," include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating "baseball cards" for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, *Principles* also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they're seeking to achieve. Here, from a man who has been called both "the Steve Jobs of investing" and "the philosopher king of the financial universe" (CIO magazine), is a rare opportunity to gain proven advice unlike anything you'll find in the conventional business press.

Muscle Cars is the story of America's pursuit of sheer horsepower in the 1960s and '70s. The first of the type, the famous Pontiac GTO or "Goat," would launch a race between America's automotive manufacturers to produce ever-more-powerful V8 engines wrapped in legendary "Coke-bottle" sheet metal styling. Following Ford's extremely successful introduction of the galloping Mustang in 1964, others would follow, such as General Motors's Camaro and Firebird as well as Plymouth's Barracuda, competing against one another on race tracks to "Win on Sunday, Sell on Monday." This book details these golden years, as well as the economic and environmental developments of the 1970s that brought an end to the muscle car era.
