This book draws on original regimental records to give by far the most detailed account ever published in English of the organization and personalities of the most renowned of the foreign units that served in the Emperor's armies. Unlike most of his foreign troops, these Polish horsemen were true volunteers, who owed their honoured place in his Imperial Guard to their proven courage and dash on battlefields from Spain to Russia. The text is illustrated with rare portraits and photographs, and with detailed colour plates of the Lancers' magnificent uniforms.

Mitsubishi's 4G63t engine is among the most powerful engines ever

in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

The intense rivalry between Mitsubishi's Lancer Evolution and Subaru's Impreza WRX is chronicled in the 400+ pages of this book by veteran automotive journalist Huw Evans. These dueling all-wheel-drive, turbocharged four-cylinders have battled each other on rally stages, road courses, drag strips, and the street across two decades and around the globe, attracting millions of rabid fans in the process. WRX vs. Evo tells the story of these groundbreaking cars from their inception to the present day. Additional coverage includes the most complete compilation of special edition cars to be found anywhere, a full rundown of official factory specs, nearly 200 photos of street and rally cars, and historical information about the two companies and the engineering, design, and race histories of these high-performance machines.
