John Wilson is a former Lead Economist in the Development Research Group of the World Bank. While at the Bank, Mr. Wilson also served in the Infrastructure Vice Presidency. In addition to directing empirical research and policy projects, he provided expertise on operational lending projects at the Bank around the world.

Governments around the world face ongoing pressures from citizens to provide more and better services, and to do this while restraining taxation levels. This provides the context for government efforts to ensure their policies and programs are as effective, and as efficient, as possible. An emphasis on government performance has led a number of governments to create formal systems for monitoring and evaluating their performance--on a regular, planned, and systematic basis--with the objective of improving it. The focus of this book is on these government monitoring and evaluation (M and E) systems: what they comprise, how they are built and managed, and how they can be used to improve government performance.

This book provides rigorous and provocative understanding of the art and practice of participatory budgeting for those interested in strengthening inclusive and accountable governance.

The World Bank is one of the most important and least understood major international institutions. This book provides a concise, accessible and comprehensive overview of the World Bank's history, development, structure, functionality and activities. These themes are illustrated with a wide variety of case studies drawn from the Bank's international activities. Also discussed are the controversial challenges that the Bank now faces in the light of the criticism from campaigners and NGOs.

The East Asia and Pacific Economic Update provides regular, biannual analyses of development trends and economic policy issues across the East Asia and Pacific region.

Lessons Learned from World Bank Education Management Information System Operations provides an overview of the World Bank ' s portfolio in the area of Education Management Information Systems (EMISs) over the course of 17 years, from 1998 to 2014. It seeks to identify overall trends and characteristics of World Bank support in this area, with the intent of informing future project preparation and analytical work. The portfolio review revealed that although several good practices were evident, operational performance of EMIS activities fell short of expectations, with widespread deficiencies that ranged from unclear definitions and understanding of the EMIS to ineffective implementation and utilization. Examples of successful activities include the development of an EMIS to manage teachers and provide access to education (for example, Afghanistan); utilization of an EMIS as a management tool (for example, Bosnia and

Herzegovina); creation of an online EMIS to improve access to education data (for example, Honduras); use of an EMIS to strengthen teaching and learning (for example, Guatemala and Lithuania); and use of an EMIS as a management tool for schools (for example, Malaysia). These success stories highlight how a well-implemented EMIS can improve the performance of an education system. The challenges that have been identified as contributing to the shortcomings are related to the following: • Misalignment of activities and unrealistic EMIS goals • Institutionalization of the EMIS • Sustainability challenges resulting from inconsistent leadership • Missed integration opportunities • Private players in education • EMIS at the local level Future projects could benefit from the SABER (Systems Approach for Better Education Results)-EMIS Assessment Framework. The SABER-EMIS Framework focuses on the need for a strong enabling environment, system soundness, quality data, and effective utilization as the key factors essential for the successful implementation of an EMIS. Initial needs assessment of a country ' s EMIS can play a critical role in benchmarking countries and provide a valuable foundation for the design of new projects.

This book assesses the prospects for achieving the sustainable development goals, and the role of international organizations in achieving them, in light of recent economic, medical, and environmental developments.

Post-crisis Growth and Development lays the groundwork for setting development priorities and advances the discussion among the G20, and non-G20 countries on development policy in infrastructure, trade, food security, financial inclusion, and Millennium Development Goals (MDGs), as they relate to strong, sustainable, and balanced global growth.

A series of crises unfolded in the latter part of the first decade of the 21st Century which combined to exacerbate already profound conditions of global economic inequality and poverty in the world ' s poorest countries. In 2007, the unsound lending practices that caused a collapse in the US housing market ushered in a broader economic crisis that reverberated throughout the global financial system. This economic shockwave had a global impact, triggering not just instability in other industrialized countries, but also in their developing world counterparts, also highlighting deficiencies in the current structures of global governance to protect the world ' s poorest and most disadvantaged. This book offers answers to questions raised about the role of global governance in the attenuation and amelioration of world poverty and inequality. The contributors interrogate the role of systems of governance at a time of global economic crisis and continuing environmental degradation against a backdrop of acceleration in inequalities within and between communities and across the globe. Evaluating how existing systems can be reformed or redesigned to be more effective at addressing issues of poverty and inequality and providing a comprehensive discussion of a wide range of global governance initiatives this work will be essential reading for students and scholars of global governance, international relations and international organizations.

Investing in Communities Achieves Results fills an important gap in the global knowledge on programs addressing HIV and AIDS, providing robust evidence that good results can be achieved by investing in communities with even limited resources.
