After enduring years of conflict and destruction, Timor-Leste has risen from the ashes and, within a short span of time, made remarkable strides toward recovery and reconstruction. It is today a nation well on its way to peace and prosperity, creating an example to be followed by other fragile and underdeveloped countries. Timor-Leste: The History and Development of Asia ' s Newest Nation examines this journey through the social, political, and economic development of the young state.

This report investigates Timor-Leste's potential to develop a vibrant, stable, and diversified economy that is not dependent on oil revenues. Implementing challenging reforms across the private sector, banking and finance, agriculture, infrastructure, and judiciary requires sound policies and effective legislation. The Government of Timor-Leste shows promising reform appetite and willingness to engage the private sector in developing alternate investment options to attract business to the country. Yet, significant challenges remain to ensure that rebuilding efforts and institutions are managed effectively to benefit all Timor-Leste's citizens. This report was produced by the Pacific Private Sector Development Initiative, a regional technical assistance facility cofinanced by the Asian Development Bank (ADB), the Government of Australia, and the New Zealand Government.

For fifty years, Australia has schemed to deny East Timor billions of dollars of oil and gas wealth. With explosive new research and access to never-before- seen documents, Kim McGrath tells the story of Australia ' s secret agenda in the Timor Sea, exposing the ruthlessness of successive governments. Australia did nothing to stop Indonesia ' s devastating occupation of East Timor, when – on our doorstep – 200,000 lives were lost from a population of 650,000. Instead, our government colluded with Indonesia to secure more favourable maritime boundaries. Even today, Australia claims resources that, by international law, should belong to its neighbour – a young country still recovering from catastrophe and in desperate need of income. Crossing the Line is a long-overdue expos é of the most shameful episode in recent Australian history. ' Revelatory, extraordinary and compelling – an absolute must-read. ' —Peter Garrett ' Crossing the Line is an unassailable expos é of Australia ' s ruthless pursuit of resources in the Timor Sea. A timely and definitive book. ' —Jos é Ramos-Horta ' Kim McGrath has trawled the national archives to produce the smoking gun on Australia ' s callous betrayal of the people who supported our commandos in World War II, and on the immoral and unlawful appropriation of their oil. ' —Paul Cleary Kim McGrath has been published in the Monthly and has long experience working in government and policy development. She is Research Director at the Bracks Timor-Leste Governance Project, which provides policy advice to the Timor-Leste government.

For the people of Timor-Leste, independence promised a fundamental transformation from foreign occupation to self-rule, from brutality to respect for basic rights, and from poverty to prosperity. In the eyes of the country ' s political leaders, revenue from the country ' s oil and gas reserves is the means by which that transformation could be effected. Over the past decade, they have formulated ambitious plans for state-led development projects and rapid economic growth. Paradoxically, these modernist visions are simultaneously informed by and contradict ideas stemming from custom, religion, accountability and responsibility to future generations. This book explores how the promise of prosperity informs policy and how policy debates shape expectations about the future in one of the world ' s newest and poorest nation-states.

This book, Rising from the Ashes: UN Peacebuilding in Timor-Leste, provides an in-depth look into the UN's first experiment in governing and building peace in the aftermath of conflict, using East Timor as a case study. It examines how the Timorese have progressed after the UN left and the challenges that lie ahead. The book is covered in two parts: in the first part, the book examines the UN's role after it entered East Timor in 1999 as the de facto government; and in the second part, the book examines how Timor-Leste has progressed in peacebuilding after the UN's withdrawal in 2012. Rising from the Ashes: UN Peacebuilding in Timor-Leste is based on the author's

first-hand experience working in the UN as it restored law and order and built a state in a country without a government, any infrastructure, or human resources. The book argues that peacebuilding is a long-term endeavor and is a work in progress in Timor-Leste, based on the good foundations laid by the UN. However, like many other developing countries, Timor-Leste has enormous challenges to address; but it also has oil resources and a young population. Its future success will depend on how its oil wealth is managed and distributed, whether it is able to bridge the urban-rural divisions in the country, provide employment for its burgeoning population, and progress economically. Last, but not least, its future success will also depend importantly, on how its leadership deals with past, namely, the continuing intra-elite divisions that are a legacy of its troubled history. They have to transcend past divisions and unite Timorese society for the future development of the country. The book ends with a set of recommendations for Timor-Leste and for the region, namely members of the Association of Southeast Asian Nations (ASEAN).

Notwithstanding impressive progress since independence in 2002, Timor-Leste remains a fragile post-conflict nation with weak human and institutional capacity and large infrastructure gaps. The main challenge facing Timor-Leste is to effectively manage its petroleum wealth to reduce public-sector dependence, diversify the non-oil economy, generate jobs for a young and rapidly-growing population, and raise living standards.

A comprehensive and extensive collection of information and documents relating to Timor-Leste petroleum activities and related issues.
