Martin Heidegger's work is pivotal in the history of modern European philosophy. The New Heidegger presents a comprehensive and stimulating overview of, and introduction to, the work of one of the most influential and controversial philosophers of our time. Heidegger has had an extraordinary impact on contemporary philosophical and extra-philosophical life: on deconstruction, hermeneutics, ontology, technology and techno-science, art and architecture, politics, psychotherapy, and ecology. The New Heidegger takes a thematic approach to Heidegger's work, covering not only the seminal Being and Time, but also Heidegger's lesser known works. Lively, clear and succinct, the book requires no prior knowledge of Heidegger and is an essential resource for anyone studying or teaching the work of this major modern philosopher.

Haunting, gripping, and psychologically fierce tales that illuminate an unsettling side of humanity from "one of the treasures of American story writing" (Jonathan Lethem). Featuring the O. Henry Prize-winning short story "Windeye," this collection of Brian Evenson's masterful stories "involve impossible scenarios and alternative realities" that are "always surprising" (Bookforum). A woman falling out of sync with the world; a king's servant hypnotized by his murderous horse; a transplanted ear with a mind of its own—the characters in these twenty-five stories live as interlopers in a world shaped by mysterious disappearances and unfathomable discrepancies between the real and imagined, revealing the breadth and depth of Evenson's uncanny vision.

This wide-ranging collection of essays offers valuable insights into the cultural issues involved in the practical application of social work theories. Leading contributors explore the challenges faced by indigenous populations and ethnic minority groups, examining how they can gain control over their position as minority populations, and offering valuable guidance on cross-cultural work. The direct implementation of four established theoretical approaches - ecological systems, community development, strengths-based approaches and attachment theories - is shown in a variety of contexts, including mental health care, trauma counselling and child protection. Using community development work in Australia and New Zealand as a case study, the contributors also advocate using these approaches in work with migrants and refugees. *Social Work Theories in Action* recognizes the importance of drawing on the strengths of families, individuals and communities and offers theoretical perspectives that can be applied in everyday work situations. It is essential reading for social and community workers, mental health professionals and social work students.
