The patrolman has the most difficult, complex, and least understood task in the police department. Much less is known of him than of his better publicized colleague, the detective. In this important and timely book, James Q. Wilson describes the patrolman and the problems he faces that arise out of constraints imposed by law, politics, public opinion, and the expectations of superiors. The study considers how the uniformed officer in eight communities deals with such common offenses as assault, theft, drunkenness, vice, traffic, and disorderly conduct. Six of the communities are in New York State: Albany, Amsterdam, Brighton, Nassau County, Newburgh, and Syracuse. The others are Highland Park, Illinois, and Oakland, California. Enforcing laws dealing with common offenses is especially difficult because it raises the question of administrative discretion. Murder, in the eyes of the police, is unambiguously wrong, and murderers are accordingly arrested; but in cases such as street-corner scuffles or speeding motorists, the patrolman must decide whether to intervene (should the scuffle be stopped? should the motorist be pulled over?) and, if he does, just how to intervene (by arrest? a warning? an interrogation?). In most large organizations, the lowest-ranking members perform the more routinized tasks and the means of accomplishing these tasks are decided by superiors, but in a police department the lowest-ranking officer--the patrolman--is almost solely responsible for enforcing those laws which are the least precise, the most ambiguous. Three ways or "styles" of policing--the watchman, the legalistic, and the service styles--are analyzed and their relation to local politics is explored. In the final chapter, Mr. Wilson discusses if and how the patrolman's behavior can be changed and examines some current proposals for reorganizing police departments. He observes that the ability of the patrolman to do his job well may determine our success in managing social conflict and our prospects for maintaining a proper balance between liberty and order. Policing and Public Management takes a new perspective on the challenges and problems facing the governance of police forces across the UK and the developed world. Complementing existing texts in criminology and police studies, Morrell and Bradford draw on ideas from the neighbouring fields of public management and virtue ethics to open the field up to a broader audience. This forms the basis for an imaginative reframing of policing as something that either enhances or diminishes "the public good" in society. The text focuses on two cross-cutting aspects of the relationship between the police and the public: public confidence and public order. Extending award-winning work in public management, and drawing on extensive and varied data sources, Policing and Public Management offers new ways of seeing the police and of understanding police governance. This text will be valuable supplementary reading for students of public management, policing and criminology, as well as others who want to be better informed about contemporary policing.

Community policing is a philosophy and organizational strategy that expands the traditional police mandate of fighting crime to include forming partnerships with citizenry that endorse mutual support and participation. The first textbook of its kind, Community Policing: A Contemporary Perspective delineates this progressive approach, combining the accrued wisdom and experience of its established authors with the latest research based insights to help students apply what is on the page to the world beyond. 'Spotlight on Community Policing Practice' sections feature real-life community policing programs in various cities, and problem-solving case studies cover special topics. The text has been revised throughout to include the most current developments in the field such as how the current climate of suspicion associated with terrorism threats affects the trust so necessary for community policing, and how the newest technologies can be harnessed to facilitate police interactions with citizens. Additionally, the book now explores the fragmentation of authority and emphasizes the importance of partnerships among the numerous law enforcement agencies, government agencies, and private social service agencies. * Each chapter contains learning objectives, key terms, and discussion questions that encourage comprehension * Video and Internet links provide additional coverage of topics discussed throughout the text. * Includes a 'Ten Principles of Community Policing' addendum

What does police violence against minorities, or violent clashes between minorities and the police tell us about citizenship and its internal hierarchies? Indicative of deep-seated tensions and negative perceptions; incidents such as these suggest how minorities are vulnerable, suffer from or are subject to police abuse and neglect in Israel. Marked by skin colour, negatively stigmatized or rendered security threats, their encounters with police provide a daily reminder of their defunct citizenship. Taking as case studies the experiences and perceptions of four minority groups within Israel including Palestinian/Arab citizens, ultra-Orthodox Jews and Ethiopian and Russian immigrants, Ben-Porat

and Yuval are able to explore different paths of citizenship and the stratification of the citizenship regime through relations with and perceptions of the police in Israel. Touching on issues such as racial profiling, police brutality and neighbourhood neglect, their study questions the notions of citizenship and belonging, shedding light on minority relationships with the state and its institutions.

Presents an interdisciplinary approach to police management, achieving a balance between theory and practice. This text offers students and those interested in managing police organizations an analytic approach to police managerial issues and practices. It also offers a historical framework for understanding contemporary police management.
