Carl Friedrich Keil (1807 - 1888) and Franz Delitzsch (1813 - 1890) were conservative German Lutheran Old Testament scholars whose commentary on the Old Testament has remained a classic for well over a century.

A major compilation & presentation of amino & DNA sequences produced under the direction of Dr. Elvin A. Kabat, who received a National Medal of Science in 1991, for his "seminal contributions in the field of immunology". Contains new & expanded sections on T-cell reactors,  $\delta$ -microglobulins, major histocompatibility antigens, complement, thymopoietin, integrins, & post-gamma globulin. Covers 9,000 sequences, plus 3 indices: index of proteins, index of antibody specificities & index of references. Best seller!!

This book constitutes the refereed proceedings of the 14th International Conference on Industrial and Engineering Applications of Artificial Intelligence and Expert Systems, IEA/AIE 2001, held in Budapest, Hungary in June 2001. The 104 papers presented were carefully reviewed and selected from a total of 140 submissions. The proceedings offer topical sections on searching, knowledge representation, model-based reasoning, machine learning, data mining, soft computing, evolutionary algorithms, distributed problem solving, expert systems, pattern and speech recognition, vision language processing, planning and scheduling, robotics, autonomous agents, design, control, manufacturing systems, finance and business, software engineering, and intelligent tutoring.

An impressive array of refined four-hand works in a variety of styles, forms, and musical idioms. Joseph Banowetz graduated with a First Prize from the Vienna Akademie fr Musik und darstellende Kunst. Banowetz has been a piano recitalist and orchestral soloist on five continents. He was awarded the Liszt Medal by the Hungarian Liszt Society in recognition of his outstanding performances of Liszt and the Romantic literature.

The Chemistry and Biochemistry of Plant Hormones: Recent Advances in Phytochemistry, Volume 7 provides an understanding of the chemistry and biochemistry of plant hormones. This book discusses the presents the experiments and techniques that lead to a deeper understanding of the mode of action of plant hormones. Organized into six chapters, this volume begins with an overview on gibberellins wherein isolation and characterization techniques are emphasized. This text then examines the status of cytokinin chemistry with emphasis on methods of structure elucidation, synthesis, and structure-activity relations. Other chapters consider the synergistic effects possible when workers from various areas are able to collaborate. This book discusses as well the chemistry of abscisic acid. The final chapter deals with the suggested paths for the biosynthesis of ethylene, which would facilitate work on the regulation of ethylene biosynthesis. This book is a valuable resource for biochemists, biophysicists, photobiologists, plant physiologists, and research workers.

This volume studies how the tradition of the Sentences developed from the twelfth century up to Martin Luther. Its twelve chapters fill major lacunae in current research on the standard textbook of medieval theology.
