PROOF MARKS 2403 The proof marks shown below will assist in determining nationality of manufacturers when no other markings are evident. Since the U.S. has no proofing houses (as in England, France, Germany and other European countries), most U.S. manufacturers voluntarily proof their firearms with a specified

PROOF MARKS Proof Marks - National Firearms Museum

Proof marks: After re-inspection and gauging, guns that pass the test – and the vast majority do – are then marked with the London proof mark. Typically, this consists of the initials ‘GP’ beneath a crown, although there are special marks for unusual tests and circumstances.

The Proof House - Worshipful Company of Gunmakers

Foreign proof marks. Prior to June 1980, there was reciprocal agreement for recognition of certain foreign proof marks, by international accord. At that time the United Kingdom became a signatory member of the International Proof Commission (C.I.P.), Secretariat, at the Belgian Proof House, Liege. Since then the United Kingdom has recognised all the proof marks of the other member nations and, reciprocally, they all recognise UK marks.

Proof Marks - Durham Constabulary

When they were made, all British guns had to be subjected to proof testing (they still are) to ensure that they were fit for purpose. The majority of marks will be found on the barrel flats, though early guns may have stamps on the tubes, under the forend. The table below can be used to see if your gun was proofed in London or Birmingham.

All proof being nitro unless otherwise stated the new service pressure was stated in tons. Only Birmingham used the per " addition and then only until 1984. Where optional metric proof was stamped after 1984 it designated proof rather than service pressure (900/1200kg). London introduced date stamps from 1972. The diamond mark lost its C. 1989 - 2006

London Proof Marks 1813 - 2006

Proof marks are stamps applied to various parts of a weapon during and after manufacture to show that the weapon is safe for use with the ammunition for which it was designed. In England, the London and Birmingham proof houses were established (in 1637 and 1813, respectively) by Royal Charter to protect the public from the sale of unsafe weapons.

Proof Marks - Ballistics - Bev Fitchett's Guns

Proof house marks are an evidential provision in . [Firearms deactivated by other means (without proof house marks) may no longer fulfil the definition of a firearm and thus no longer require domestic authority to possess/acquire/sell etc.]Depending upon when they were deactivated, some weapons are more easily reactivated than others.

Deactivated weapons Document information

Proofreading marks and symbols Although a significant amount of editing and proofreading is now done using tools such as Microsoft’s track changes feature and Adobe’s commenting tool, you may find yourself faced with traditional proofreading marks and symbols on a printed document someday.

Proofreading marks and symbols | Wordy

In the UK, the most up-to-date BS1 standard for UK proofreading marks* is BS 5261C (2005). The marks fall into three broad categories.

The mark of a proofreader - Full Proof

Proof marks. A proof mark is a mark specific to the manufacturer, importer, or testing facility that is performing the test. It generally takes the form of a stamp that makes an impression in the metal. Since proof marks are unique and nearly universal, they are often used to identify the origins of firearms that lack normal manufacturer's markings, such as military weapons, which are often produced by large numbers of different manufacturers.

At a time when crime scene television shows are all the rage amongst the civilian population, knowledge of firearm forensics is of paramount importance to crime scene analysts, police detectives, and attorneys for both the prosecution and the defense. Cartridges and Firearm Identification brings together a unique, multidisciplinary approach to questions that arise regarding ammunition and firearms within the context of investigation. Supplying essential practical information about firearms and ammunition in a clear, easy-to-follow format, this volume: Defines and depicts photographically all varieties of firearms Presents Investigative concerns of firearms evidence from the perspectives of evidence preservation and safe handling procedures Introduces readers to the standards of measurement used to classify ammunition, including the significance of names, adjectives, and other descriptors used in conjunction with ammunition cartridges Categorizes and identifies ammunition head stamps from cartridges produced around the world Provides ammunition manufacturing practices for dozens of nations The text offers a methodology for the identification of unknown firearms as well as ammunition of questioned identity. The author explains the terminology and describes each group of firearms and the aspects that identify the weaponry—including property marks, proof marks, and patent dates. Lavishly illustrated, this comprehensive reference includes case studies to support the text, making it a premier reference for all those responsible for the complicated task of investigating firearms and cartridges.

The new 33rd Edition of the Blue Book of Gun Values by S.P. Fjestad has been expanded to 2,432 pages, easily making it the highest page count of any firearms book currently in print. New 2012 makes and models have been included, along with updated values on discontinued firearms and antiques. Once again, the 80-page Photo Percentage Grading System™ provides high resolution color images that are the last word to help ascertain any firearm's correct condition factor based on the percentage of original condition. Revolvers, pistols, rifles, and shotguns are also shown separately, in addition to NRA Antique Condition Factors.

"Here is a book for the historian, the student, the gun collector or aficionado. . . . It approaches understatement to call Guns on the Early Frontiers an outstanding contribution to firearms literature. It sets its own standard."--New York Times. "A Glossary of Gun Terms, ample footnotes most skillfully arranged and illustrations beyond the dreams of avarice complement the text, which achieves the miracle of scholarship without tedium."--W.H. Hutchinson, San Francisco Chronicle. "Not the least interesting portions of the book are the notes and glossary and the excellent bibliography. Here [is] a book designed primarily for the serious collector or gun historian, but whose readable style should appeal even to the casual amateur. The collecting of old guns, whether privately or by a public institution, involves a certain responsibility. These guns, whose history is inextricably linked with the history of settlement, require something more than careful preservations. They require--and the present volume goes far to supply--accurate documentation."--Canadian Historical Review. Carl P. Russell, a leading authority on firearms of the American frontier, was coordinator of planning for the science and history museums and other interpretive facilities of the National Park Service in the Western United States.

This is a facsimile of "The Book of the Pistol" by Hugh B. C. Pollard, originally published in 1917. Written from a British perspective, this book is a complete treatise on the handgun and its uses. A book that was intended for both the handgun collector and the avid shooter, Pollard covers the fascinating history of the pistol, starting with the invention of gunpowder and continuing up until the modern era (1917). He explains the technological advancements and the wars in which each the pistol was used. Pollard then turns an eye to the practical, focusing on learning how to shoot and develop great skill with the handgun. He introduces the reader to both target shooting and practical self defence shooting. The book includes many photographs as well as tables of technological data.

ARES Field Guide No.1 focuses on identifying and tracing Belgian FN Herstal FAL rifles, and provides key information on factory markings and physical characteristics. The guide further describes the primary variants produced by FN Herstal in Belgium, discusses FAL rifles documented in the Middle East/North Africa (MENA) region, and looks at some of the factors involved in their illicit diversion, using the ongoing conflict in Syria as a case study. Field Guide No. 1 is supported by Research Note No. 9 – Estimating Year of Production for FAL Rifles, and the accompanying FAL Year of Production Estimator online tool, which calculates the likely year of production for a given FN Herstal FAL serial number.
