**Radio Antenna**

**Engineering: Laport,**

**Edmund: Amazon.sg:**

**Books**

Radio masts and towers are typically tall structures designed to support antennas for telecommunications and broadcasting, including television. There are two main types: guyed

Download Free

Radio Antenna

and self-supporting By

structures. They are  
among the tallest human-  
made structures. Masts

are often named after  
the broadcasting

organizations that  
originally built them or  
currently use them. In

the case of a mast  
radiator or radiating  
tower, the whole mast or  
tower is itself the  
transmitting antenna.
