changing society. The resultant photo book, *The Americans*, represents a seminal moment in both photography and in America's understanding of itself. To mark the book's fiftieth anniversary, Jonathan Day revisits this pivotal work and contributes a thoughtful and revealing critical commentary. Though the importance of *The Americans* has been widely acknowledged, it still retains much of its mystery. This comprehensive analysis places it thoroughly in the context of contemporary photography, literature, music, and advertising from its own period through the present.

From the author of the acclaimed James Brown biography *The One* comes the first in-depth biography of renowned photographer and filmmaker Robert Frank, best known for his landmark book *The Americans*. As well-known as Robert Frank the photographer is, few can say they really know Robert Frank the man. Born and raised in wartime Switzerland, Frank

discovered the power and allure of photography at an early age and quickly learned that the art meant significantly more to him than the money, success, or fame. The art was all, and he intended to spend a lifetime pursuing it. American Witness is the first comprehensive look at the life of a man who's as mysterious and evasive as he is prolific and gifted. Leaving his rigid Switzerland for the more fluid United States in 1947, Frank found himself at the red-hot social center of bohemian New York in the '50s and '60s, becoming friends with everyone from Jack Kerouac, Allen Ginsberg, and Peter

Orlovsky to photographer Walker Evans, actor Zero Mostel, painter Willem de Kooning, filmmaker Jonas Mekas, Bob Dylan, writer Rudy Wurlitzer, jazz musicians Ornette Coleman and Charles Mingus, and more. Frank roamed the country with his young family, taking roughly 27,000 photographs and collecting 83 of them into what is still his most famous work: *The Americans*. His was an America nobody had seen before, and if it was harshly criticized upon publication for its portrait of a divided country, the collection gradually grew to be recognized as a transformative American vision. And then he turned his back on

certain success, giving up photography to reinvent himself as a film and video maker. Frank helped found the American independent cinema of the 1960s and made a legendary film with the Rolling Stones. Today, the nonagenarian is an embodiment of restless creativity and a symbol of what it costs to remain original in America, his life defined by never repeating himself, never being satisfied. American Witness is a portrait of a singular artist and the country that he saw.

famous and influential photography book contained a series of deceptively simple photos that he took on a trip through America in 1955 and 1956. These pictures of everyday people still speak to us today, 40 years and several generations later.

In 1951 and early 1952, Robert Frank visited London - "I liked the light. I liked the fog." - and set out to photograph the unique atmosphere of the city. He juxtaposed money and work, wealth and poverty, creating a dynamic photographic project that has never been shown before in its entirety. In March

1953, Frank traveled to the town of Careau, in Wales, to photograph coal miners. In Robert Frank: London/Wales, Frank returns for the first time to these old negatives. The volume explores a stylistic transformation in his work, a period of development that saw his photography move from an innovative romanticism to a highly charged, metaphorical realism. These two consecutive projects set the stage for his truly groundbreaking documentary, The Americans, completed just a few years later.

1952, Black White and Things was in its original form a book hand-crafted by Robert Frank in 1952. Frank made three identical copies designed by Werner Zryd, each with spiral binding and original photographs. Printed for an exhibition at the National Gallery in Washington in 1994, Frank has now redesigned the book. Separated into three categories "black", "white", and "things", which are shaped more by mood than subject matter, the book traces Frank's travels to cities such as Paris, New York, Valencia and St. Louis. In the white section for instance, he brings photographs of vastly different

motifs under a single aesthetic umbrella - his first wife reclining with their new-born baby, peasants squatting against a flaking wall in Peru, and a business man strolling past a snowdecked tree in London.

This book, based on the Frank collection at the Cantor Arts Center at Stanford University, focuses on his American work. Its sequence of 131 plates integrates twenty-two photographs from "The Americans" with more than 100 images to chart the major themes and pictorial strategies of his work in the United States in the 1950s. The text

reconsiders Frank's first photographic career and examines how he used the range of photography's 35mm vocabulary to reclaim the medium's artistic tradition from the hegemony of the magazines.
