Despite the formidable growth of urban tourism there has been little of the critical engagement that one would expect from the social sciences: the rich potential of contemporary social science for urban tourism has yet to be realized. Martin Selby's textbook makes available to practitioners and students seeking to understand the phenomenon of tourism in towns and cities the methods and concepts that are currently enhancing and transforming our understanding of society in other areas of the social sciences. With an emphasis on image, culture and experience, the author draws upon the "cultural turn" to explains the human aspects of the urban tourism phenomenon. The discussions emphasize the significance of urban tourism within debates upon the contemporary city, postmodernity and the pursuit of social science. Clearly written, with case studies and further reading, this book should be welcomed by students and lecturers in geography, tourism, planning and sociology.

"Terrorists strike again at the heart of American commerce and banking with devastating effect. A twenty-five-hundred-year old Persian artifact incites the Muslim world and seriously undermines the credibility of certain Christian beliefs concerning their Messiah. A new technology is discovered which changes the balance of power around the globe. Are these random events or carefully laid plans to change the order of the world? A college research paper leads to the rediscovery of a biblical code hidden for almost two thousand years. Its implications reverberate through four thousand years of history. Its author and his friends find themselves sucked into a conspiracy of historic proportions. Will they make sense of the events before it's too late? An epic battle is waged as powerful interests fight to control the knowledge of the 13th enumeration."--p.[4] of cover.
