—Connor's story

A mission gone wrong. Innocent lives have been lost. Escaping wrongful imprisonment wasn't something Connor had in mind, but being put into stasis aboard Earth's first interstellar colony ship was something he couldn't have prepared for. For three hundred thousand colonists, the new colony brings the promise of a fresh start ... a second chance.

Exploring New Earth should be a thrilling undertaking. Instead, the more the colonists learn about the planet, the more alarmed they become. Alien ruins hint at a species who fought great wars among themselves and disappeared centuries ago. When Connor Gates discovers a hidden bunker, he finds something he never expected. Everything the colonists have learned about New Earth

Hold the line. After narrowly defeating the invading enemy fleet, there is evidence that the attack isn't over. Thousands have died and all that stands between human extinction and the invaders are the remnants of the colonial military. Connor must find a way to rally the colony using every scrap of ingenuity to stop the invaders. But will he succeed when he finds himself pitted against mankind's ultimate enemy? This could be mankind's final hour ... or its greatest victory.

As the colony grapples with the realization that New Earth is not as uninhabited as they'd once thought, tensions between the colonial settlements rise to new heights, and the Colonial Defense Force finds itself caught in the middle. When Connor uncovers evidence of a militant colonial faction secretly exploiting the NEIIS, he has to investigate. Connor learns that some of the colonial settlements have been holding back discoveries of their own. He'd thought the NEIIS were a threat to the colony, but he was wrong. They all were, and the truth is beyond anything Connor could have imagined. Meanwhile, Colonel Sean Quinn's latest mission brings him off-world to investigate a previously discovered NEIIS settlement. When all communications from home go silent, he must return to New Earth to investigate. Cut off from everything, Sean must lead the crew of a CDF warship against a mysterious foe. Sean must forge a path into the unknown if he's to have any hope of unraveling the mystery. Emergence is the sixth book in the best selling First Colony military space opera series.

A colony divided. The Krake, a mysterious enemy who has brought about the collapse of entire civilizations, is hunting for New Earth. Connor Gates, former elite soldier and now general of the colonial military, must find a way to protect the colony, which seems all but impossible when both humans and aliens alike are ignoring the very threat that should be uniting them all. To forge a future for the colony, Connor must risk everything. Battle weary but vigilant, Colonel Sean Quinn must rebuild the morale of Trident Battle Group while fulfilling his mission, but when he receives an invitation to meet a Krake rebel faction, he must act. Sean seizes a rare opportunity to gather crucial intel about the enemy and possibly gain an ally, but can he trust them or will their betrayal doom them all. Harbinger is the ninth book in the bestselling military science fiction series, First Colony. Read the ninth book of this epic today!

They've spent years exploring this world, but they were living on borrowed time. Only they didn't know it. Six months ago, Connor learned what the alien race that populated New Earth feared—a mysterious enemy who nearly brought about the collapse of an entire civilization. To help the colony prepare for this new threat, Connor rejoins the Colonial Defense Force. Using alien technology, Connor opens a gateway to another universe hoping to learn more about the threat. Instead, he receives a colonial distress beacon. Six months ago, they'd left people behind on a mission, all presumed dead. The beacon might be them, or it might be a trap, but Connor will not ignore the call for help. Fearing the beginning of another war, the colonial government would rather do nothing than risk bringing attention to the colony, but it's already too late. The colony stands upon a crossroads. Its future is uncertain. They'll have to adapt if they're to survive. Vigilance is the seventh book in the bestselling First Colony series.

Eva Nine was raised by the robot Muthr. But when a marauder destroys the underground sanctuary she called home, twelve-year-old Eva is forced to flee aboveground. Eva Nine is searching for anyone else like her. She knows that other humans exist because of a very special item she treasures – a scrap of cardboard on which is depicted a young girl, an adult, and a robot along with the strange word "WondLa". Tony DiTerlizzi honours traditional children's literature in this totally original space age adventure: one that is as complex as an alien planet, but as simple as a child's wish for a place to belong.

Sass versus AI! Sanctuary, high-tech paradise with small-town charm! Leave a message at the beep. In a flash of old-fashioned warp, Sass's crew catches up in time to Prosper. Eager to greet a new world, instead Sass's comms are blocked by an AI answering machine from hell. Sanctuary is refuge to the Colony Corps who transported settlers from Earth. Compared to Thrive's home moon of Mahina, it's a paradise. People are healthy. Their dome stretches over sports fields. Electric horses and fun three-wheelers are available to venture out, complete with breath mask. Robots do the work. Something is off here. And Sass is doomed to fix it. Can Sass liberate Sanctuary from its diabolical AI? Are Sass and Clay the perfect foils? Or just the most vulnerable? And must Thrive crew get jailed on every world they visit? Don't miss Sass's showdown with that nemesis your mother warned you about - someone just like her. Grab it now!

The brilliant 1969 Hugo Award-winning novel from John Brunner, Stand on Zanzibar, now included with a foreword by Bruce Sterling Norman Niblock House is a rising executive at General Technics, one of a few all-powerful corporations. His work is leading General Technics to the forefront of global domination, both in the marketplace and politically---it's about to take over a country in Africa. Donald Hogan is his roommate, a seemingly sheepish bookworm. But Hogan is a spy, and he's about to discover a breakthrough in genetic engineering that will change the world...and kill him. These two men's lives weave through one of science fiction's most praised novels. Written in a way that echoes John Dos Passos' U.S.A. Trilogy, Stand on Zanzibar is a cross-section of a world overpopulated by the billions. Where society is squeezed into hive-living madness by god-like mega computers, mass-marketed psychedelic drugs, and mundane uses of genetic engineering. Though written in 1968, it speaks of now, and is frighteningly prescient and intensely powerful. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
