Here is the ultimate book on the worldwide movement of hackers, pranksters, and activists that operates under the non-name Anonymous, by the writer the Huffington Post says "knows all of Anonymous' deepest, darkest secrets." Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside-outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of "trolling," the ethics and metaphysics of hacking, and the origins and manifold meanings of "the lulz."

Bringing criminal law to life. Criminal Law Today, Fifth Edition, brings criminal law to life by relating it to real stories from today's headlines. The text's approach is strongly influenced by the belief that the law has always been, and remains, a vital policy-making tool. As a topic for study and discussion, the nature and life of the law is more important today than ever before. The text highlights the challenges that face the law as it continues to adapt to the needs of a complex and rapidly changing society and features a balanced text/casebook approach that provides a lively introduction to criminal law. Effective in-text learning tools give students the

resources they need to master the material presented in the text. MyCJLab was designed to meet the needs of today's instructors and students. MyCJLab provides instructors with a rich and flexible set of course materials, along with course management tools that make it easy to deliver all or a portion of your course online. MyCJLab provides students with a personalized interactive learning environment, where they can learn at their own pace and measure their progress.

This book was written for the person who understands that there is so much more for them to accomplish but just can't seem to breakthrough. One of the traps in life is being satisfied with a 211 degree life. This is a very good life and many would characterize it as a successful life. But for the person who should be living at 212 degrees they feel like the oyster with sand in its shell, very agitated. Many times they can't put their finger on what is wrong or what is needed. Even the Christian living a good life before God can feel that something is missing. The thing missing is their purpose. They love the Lord and all that He provides but they realize there is more they should be doing for Him. If you feel like you are not walking in your purpose then this is the book for you! One Degree of Change: How to Succeed Now! will open your heart and mind to just how close you really are to accomplishing what the Lord has designed you for. It will provide much needed answers for your advancement. Because you are only one degree from the success you desire.

Solomon Northup was born a free black man. He was kidnapped, tortured, and sold into slavery. For 12 years, he was kept in bondage as a slave in Louisiana--Twelve Years a Slave is his moving and raw account of survival and life as a slave. This edition includes the full book as well as a comprehensive companion with historical notes, character overview, themes overview, and chapter summaries.

This Dictionary offers a fresh, up-to-date look at US government and politics, explaining and where necessary demystifying the key terms used in discussion of the political system. Major figures, events, ideas, movements and Supreme Court cases relevant to a study of the American political system are included with the aim of allowing readers to develop a deeper knowledge and understanding of the area. The Dictionary also raises key issues and areas of contention and academic debate. Coverage is comprehensive, with c.400 entries, each providing analysis of the subject. Terms are presented in an A-Z format with cross-referencing where appropriate.

Biography of Frank Lutz, researcher in genetics, who conducted a lengthy and unusual study on the common fruit fly.

Gray zeroes right in on the key techniques of processes and interprocess communication from primitive communications to the complexities of sockets. The book covers every aspect of UNIX/Linux interprocess communications in sufficient detail to allow experienced

programmers to begin writing useful code immediately.

In today's high-speed culture, there's a prevailing sense that we are busier than ever before and that the pace of life is too rushed. Most of us can relate to the feeling of having too much to do and not enough time for the people and things we value most. We feel fragmented, overwhelmed by busyness and the tyranny of gadgets. Veteran pastor and teacher Arthur Boers offers a critical look at the isolating effects of modern life that have eroded the centralizing, focusing activities that people used to do together. He suggests ways to make our lives healthier and more rewarding by presenting specific individual and communal practices that help us focus on what really matters. These practices--such as shared meals, gardening, hospitality, walking, prayer, and reading aloud--bring our lives into focus and build community. The book includes questions for discernment and application and a foreword by Eugene H. Peterson.

This book constitutes the refereed proceedings of the 12th International Conference on Algorithms and Computation, ISAAC 2001, held in Christchurch, New Zealand in December 2001. The 62 revised full papers presented together with three invited papers were carefully reviewed and selected from a total of 124 submissions. The papers are organized in topical sections on combinatorial generation and optimization, parallel and distributed algorithms, graph drawing and algorithms, computational geometry, computational complexity and cryptology, automata and formal languages, computational biology and string matching, and algorithms and data structures.

Words, Words, Words is all about the wonder of words. Drawing on a lifetime's experience, David Crystal explores language in all its rich varieties through words: the very building blocks of our communication. Language has no life of its own: it only exists in the mouths and ears, hands, eyes and brains of its users. As we are guided expertly and passionately through the mysteries and delights of word origins, histories, spellings, regional and social variations, taboo words, jargon, and wordplay, the contribution we all play in shaping the linguistic world around us becomes evident. Words, Words, Words is a celebration of what we say and how we say it. It invites us to engage linguistically with who we are: to understand what words tell us about where we come from and what we do. And as they continually shape our lives, it suggests ways that we can look at words anew and get involved with collecting and coining words ourselves.
