This key text is written for senior undergraduate and graduate engineering students. It delivers a complete introduction to finite element methods and to automatic adaptation (error estimation) that will enable students to understand and use FEA as a true engineering tool. It has been specifically developed to be accessible to non-mathematics students and provides the only complete text for FEA with error estimators for non-mathematicians. Error estimation is taught on nearly half of all FEM courses for engineers at senior undergraduate and postgraduate level; no other existing textbook for this market covers this topic. The only introductory FEA text with error estimation for students of engineering, scientific computing and applied mathematics includes source code for creating and proving FEA error estimators

"How do I know I covered all the requirements? Where do I begin? When should I stop? Did I miss something that will result in unpleasant surprises down the road?" If you are a Business Analyst, these questions will certainly mean something to you. You've probably asked yourself these questions at one point or another when you were assigned your early requirements development tasks.In this book, I introduce a requirements development roadmap that will guide you from start to finish. It is a plan carefully prepared and organized around consecutive stations. At each station, I tell you:1. The target objective, and why you need to think about that particular objective at that specific point in time2. Which elicitation techniques will best serve the objective, and which questions to ask in order to capture the information you need3. Which analysis tools to apply in order to analyze the information from different angles4. How to document the output of the exercise that you just performed

Following the tattoo industry's latest trend, creating tattoos that include the ashes of a customer's dead relatives, leads to trouble for Mike, who just began a new relationship with a body piercer, when his tattoos are linked to a serial killer.

2010. The newest flashpoint is the 'Dos Laredos,' Nuevo Laredo, Mexico connected by two bridges and a rail link to its sister city, Laredo, Texas.Nuevo Laredo: A Prelude To War follows NYC reporter Doug McKenzie whose current assignment is a double murder. Leading him into Northern Mexico and to a violence ridden drug trade that is ending. Principally payoffs from the transshipment and protection of illegal drugs north into the United States. It is being replaced by more benign payoffs made by corporations seeking access to cheap, unregulated labor markets.Elimination of the drug trade will be through a modification of the banking laws of Mexico. Essentially a buyout of the six major drug organizations. The U.S. DEA will overreact, sending in agents to Monterrey, Mexico to bring back the drug lords assembled there for the purpose of disbanding. An equally if not more violent response from Mexico and the helicopter transports will not make it back to home base...
