When trying on your new potential ski boots go over these tips: There should be a piece of boot touching every part of your foot. It should feel like a nice handshake around the foot, not squeezing and painful. Do not over tighten the buckles. This will create pressure points and numbness. Always stand up to see how the boot feels. Try on your ski boots later in the day. Feet have a tendency to swell a bit throughout the day, this helps to cut down the risk of buying boots too small.

Ski Boot Sizing. Mondopoint Sizing: Downhill ski boots often use an international sizing standard called mondopoint, which officially calculates the width and the longest length of your foot in millimeters. But many boot manufacturers commonly express mondopoint (or mondo) in centimeters so you may see 26.5 rather than 265 mm. Sizes are not always uniform by brand or even from one model to another, so be sure to consult the brand's boot sizing chart.

Presents historical background on ski mountaineering, which is climbing a mountain on skis and then skiing down the slopes, and offers tips on climbing and skiing specific mountains.

When was the first ski tow in the United States built? Where was the first chairlift in the world located? Who created the Arlberg Method for ski instruction? Who shot Spider Sabich? The history of skiing is filled with memorable people, exciting places, and incredible events. In Retro-Ski: A Nostalgic Look Back at Skiing, author, columnist, and longtime skiing fanatic Greg Morrill takes a look back at the history of the sport, recalling memories from days gone by. In each chapter Morrill poses a trivia question relating to a topic in skiing history and explores related topics through both personal memories and historical research. If you've ever ridden a rope tow, owned wooden skis, or laced a long-thong, Morrill's insights may enliven your memories and make you smile. And if you've never had the "pleasure" of those experiences, you'll come to appreciate what you've missed.

Offers ideas and concepts that provide improvements for skiers of all levels of ability.
