TC 7-21 is organized into the following eight chapters and four appendices that provide Stryker driver training strategies and training support materials: Chapter 1, Introduction, explains the purposes, focus, and contents of the manual.Chapter 2, Driver Selection, Training, and Supervision, describes a system for identifying, selecting, and qualifying Stryker vehicle drivers. Chapter 3, Safety Awareness, examines the safeguards necessary to ensure vehicle operators do not place the physical well-being of people in jeopardy. Chapter 4, Environmental Awareness, examines the safeguards necessary to ensure the environment is not placed in jeopardy by vehicle operators. Chapter 5, How to Use Training Support Packages (TSPs), describes the learning objectives of TSPs and how to access them for use. Chapter 6, Stryker Drivers Vision Enhancer AN/VAS-5, explains Stryker driver use of the DVE. Chapter 7, Stryker Driver Trainer, explains Stryker driver use of the Stryker Driver Trainer. Chapter 8, Driving with Slat Armor, describes the vehicle’s attachable armor commonly in use. Appendix A, Stryker Combat Vehicle Driver TSPs, lists all available TSPs. Appendix B, Sample Operator/Driver Training Schedule Calendar (10 Day), contains a sample training calendar for adaptation and use. Appendix C, Stryker Driver Training Courses, discusses training course design and procedures.Appendix D, Lessons Learned, uses a Stryker-comparable U.S. Marine Lessons Learned LAV report of experiences in Iraq.

This manual is based on the premise that although the unit organization, weapon systems, and conditions have changed, section and platoon maneuver, movement, reconnaissance, and surveillances have not. This manual describes the doctrinal and tactical employment principles for the Stryker reconnaissance vehicle (RV)-equipped infantry battalion reconnaissance platoon, which is an element of the Stryker brigade combat team (SBCT). It provides emerging doctrine, tactics, techniques, and procedures (TTP) for the SBCT infantry battalion reconnaissance platoon and its teams and sections. This manual provides the platoon and team leaders with tactics, techniques, and procedures to exploit reconnaissance platoon capabilities through situational understanding (SU), which will reduce vulnerabilities and enable the parent unit to obtain the required information to defeat the enemy on the battlefield. Although this manual reemphasizes critical information from other manuals, the user must continue to refer to other manuals for in-depth discussions of particular subjects.

This publication, "Mortars" (FM 3-22.90), prescribes guidance for leaders and crewmen of mortar squads. It concerns mortar crew training, and it is used with the applicable technical manuals (TMs) and Army Training and Evaluation Programs (ARTEPs). It presents practical solutions to assist in the timely delivery of accurate mortar fires, but does not discuss all possible situations. Local requirements may dictate minor variations from the methods and techniques described herein. However, principles should not be violated by modification of techniques and methods. The scope of this publication includes mortar crew training at the squad level. The 60-mm mortar, M224; 81-mm mortar, M252; and 120-mm mortars, M120/M121 are discussed, to include nomenclature, sighting, equipment, characteristics, capabilities, and ammunition.

"The authors of this report seek to understand how network-centric operations (NCO) capabilities are a source of combat power for the Army’s Stryker brigade and to determine the extent to which the tenets of NCO are realized by the unit. Using a broad range of measures of effectiveness, the authors compared the performance of a Stryker brigade with that of a nondigitized light infantry brigade in certification exercises at the Joint Readiness Training Center and found that the Stryker brigade’s superior networking capabilities, superior shared situational awareness, speed of command, and ability to control the speed of command vastly improved the brigade’s performance in these exercises. Using NCO measures of effectiveness, this analysis sheds light on the NCO capabilities that made the Stryker brigade a more agile and effective combat force. The authors conclude by discussing the potential implications of future NCO capabilities for future Army forces."--BOOK JACKET.

This manual describes the doctrinal and tactical employment principles for the Stryker reconnaissance vehicle (RV)-equipped infantry battalion reconnaissance platoon, which is an element of the Stryker brigade combat team (SBCT). It provides emerging doctrine, tactics, techniques, and procedures (TTP) for the SBCT infantry battalion reconnaissance platoon and its teams and sections. This manual provides the platoon and team leaders with tactics, techniques, and procedures to exploit reconnaissance platoon capabilities through situational understanding (SU), which will reduce vulnerabilities and enable the parent unit to obtain the required information to defeat the enemy on the battlefield.
