Etan's body was never found, and he was declared legally dead in 2001. In April 2017, Etan's parents watched in court as Hernandez was sentenced to at least 25 years behind bars for kidnapping and murdering their son. Josef Fritzl kept his daughter captive for 24 years

Case Studies | The Dead

Adopted at more than 1,000 colleges and universities, Bedford/St. Martin's innovative Case Studies in Contemporary Criticism series has introduced more than a quarter of a million students to literary theory and earned enthusiastic praise nationwide. Along with an authoritative text of a major literary work, each volume presents critical essays, selected or prepared especially for students, that approach the work from several contemporary critical perspectives, such as gender criticism and cultural studies. Each essay is accompanied by an introduction (with bibliography) to the history, principles, and practice of its critical perspective. Every volume also surveys the biographical, historical, and critical contexts of the literary work and concludes with a glossary of critical terms. New editions reprint cultural documents that contextualize the literary works and feature essays that show how critical perspectives can be combined.

This book divides into two parts. The first is a personal narrative of the impact of the death of the author's son Ralph on him and his family and his efforts to see if there was any evidence for his continued existence (generated largely through visits to mediums) that a thinking person could take seriously. The second is an attempt to evaluate that evidence objectively (based on an extensive survey of current and past scientific research in the UK and the USA). The title reflects the inevitable tension between emotion and intellect in such an enquiry.

This edition of Joyce's classic short story from Dubliners presents the 1969 Viking critical edition, prepared by Robert Scholes, along with five critical essays - newly commissioned or revised for a student audience - that read "The Dead" from five contemporary critical perspectives. Each critical essay is accompanied by a succinct introduction to the history, principles, and practice of the critical perspective, and a bibliography that promotes further exploration of that approach. The text and essays are further complemented by an introduction providing biographical and historical contexts to Joyce and "The Dead," a survey of critical responses to the story since its initial publication, and a glossary of critical and theoretical terms.

Case Studies | The Dead

Rev. ed. of: Case studies in nursing ethics / Robert M. Veach, Sara T. Fry. 1987.

A common complaint of recent seminary graduates is their lack of preparation in practical theology, especially in the tasks of leadership. New pastors encounter a host of challenges that can seem overwhelming. Biblically oriented, wise, and reassuring, Dana Fearon presents twenty-one difficult situations that young ministers are likely to face on the job, including prayer in the hospital room, a request to baptize a dead infant, handling conflict and criticism, entering dangerous areas to reconcile hostile groups, and others. As part of his discussion, Fearon presents and reviews his own response to such situations, using his theological education and long experience in church ministry to instruct others.

Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. As the healthcare professional in closest contact with both the patient and the physician, nurses face biomedical ethical problems in unique ways. Accordingly, Case Studies in Nursing Ethics presents basic ethical principles and specific guidance for applying these principles in nursing practice, through analysis of over 150 actual case study conflicts that have occurred in nursing practice. Each case study allows readers to develop their own approaches to the resolution of ethical conflict and to reflect on how the traditions of ethical thought and professional guidelines apply to the situation. The Fourth Edition has been completely revised and updated. It includes two new chapters, one on Moral Integrity and Moral Distress which contains AACN model of moral distress and work and one on Respect which addresses several aspects of the general problem of showing r

Using real stories with quantitative reasoning skills emmeshed in the story line is a powerful and logical way to teach biology and show its relevance to the lives of future citizens, regardless of whether they are science specialists or laypeople.¶¶from the introduction to Science Stories You Can Count On
This book can make you a marvel of classroom multitasking. First, it helps you achieve a serious goal: to blend 12 areas of general biology with quantitative reasoning in ways that will make your students better at evaluating product claims and news reports. Second, its 51 case studies are a great way to get students engaged in science. Who wouldn't be glad to skip the lecture and instead delve into investigating cases with titles like these: ¶¶A Can of Bul? Do Energy Drinks Really Provide a Source of Energy?¶¶ELVIS Meltdown! Microbiology Concepts of Culture, Growth, and Metabolism! ¶¶The Case of the Druid Dracula! ¶¶As the Worm Turns: Speciation and the Maggot Fly! ¶¶The Dead Zone: Ecology and Oceanography in the Gulf of Mexico!
Long-time pioneers in the use of educational case studies, the authors have written two other popular NSTA Press books: Start With a Story (2007) and Science Stories: Using Case Studies to Teach Critical Thinking (2012). Science Stories You Can Count On is easy to use with both biology majors and nonscience students. The cases are clearly written and provide detailed teaching notes and answer keys on a coordinating website. You can count on this book to help you promote scientific and data literacy in ways to prepare students to reason quantitatively and, as the authors write, 'to be astute enough to demand to see the evidence.¶¶

Case Studies | The Dead

A truly interdisciplinary approach to this core subject within Forensic Science Combines essential theory with practical crime scene work Includes case studies Applicable to all time periods so has relevance for conventional archaeology, prehistory and anthropology Combines points of view from both established practitioners and young researchers to ensure relevance
