This book constitutes the refereed proceedings of the 5th International Conference on Pervasive Computing Paradigms for Mental Health, MindCare 2015, held in Milan, Italy, in September 2015. The 23 full papers and 6 short papers presented were carefully reviewed and selected from 40 submissions. The papers deal with the use of technologies in favor of maintaining and improving mental wellbeing. They focus on building new computing paradigms and on addressing a multitude of challenges in mental healthcare, for example in psychiatric and psychological domains

with emphasis on new technologies, such as video and audio technologies and mobile and wearable computing.

The book provides a historical overview of adult literacy theory, policy, practice, and research from the mid-1980s to the present. The main focus is a descriptive analysis of three distinctive schools of literacy: the Freirean-based participatory literacy movement grounded in oppositional politics and grass-roots community activism; the British-based New Literacy Studies that focuses on the ways in which diverse students utilize various literacy practices in their daily lives; and the U.S. federal government's focus on functional literacy linked to a 45-year policy emphasis on workforce readiness. These three schools of thought lead to substantially different implications over such critical areas as curriculum,

assessment and accountability, and the socio-cultural role of literacy, policy, and political culture, which are discussed throughout the chapters of the book. This discussion includes a chapter on research traditions that closely parallels these perspectives on literacy education.

Demetrian argues that unless values grounded ultimately in political culture emerge, it is exceedingly unlikely that the adult literacy field will be able to move from its current marginalized status toward that of achieving the level of public and policy legitimacy many believe it needs for its long-term institutional flourishing. It is argued that any settlement of this issue must be accomplished in the field of practice rather than the ground of theory, even as theoretical insight can help to frame the issues. *Conflicting Paradigms in Adult Literacy Education: In Quest of a U.S. Democratic Politics of Literacy*

speaks to a wide audience, including not only the adult literacy community, but anyone interested in educational theory, practice, policy, research traditions, or political culture, and more fundamentally, in their intersection. Given the breadth of the topics covered, as well as the broad scope of the argument, the book is also meant for those who would like to gain a useful perspective on contemporary U.S. culture, through the window of these conflicting tensions within the field of adult literacy education.

Thoroughly revised and updated, this third edition integrates perspectives from the social sciences and the humanities, focusing on methodology as a strategic level of analysis that joins practical applications with theoretical issues. The Handbook comprises three main elements: historical accounts of the development of

key concepts and research traditions; Th systematic reviews of media organizations, discourses, and users, as well as of the wider social and cultural contexts of communication; and practical guidelines with sample studies, taking readers through the different stages of a research process and reflecting on the social uses and consequences of research. Updates to this edition include: An overview of the interrelations between networked, mass, and interpersonal communication. A new chapter on digital methods. Three chapters illustrating different varieties of media and communication research, including industry-academic collaboration and participatory action research. Presentation and discussion of public issues such as surveillance and the reconfiguration of local and global media institutions. This book is an invaluable reference work for students and researchers in the fields of

An invaluable resources for the study of the relation of business, economics, ethics, and religion.

The authors argue in this book that social theory can usefully be conceived in terms of four broad paradigms, based upon different sets of meta-theoretical assumptions with regard to the nature of social science and the nature of society. The four paradigms - Functionalist, Interpretive, Radical Humanist and Radical Structuralist - derive from quite distinct intellectual traditions, and present four mutually exclusive views of the social work. Each stands in its own right, and generates its own distinctive approach to the analysis of social life. The authors provide extensive reviews of the four

paradigms, tracing the evolution and inter-relationships between the various sociological schools of thought within each. They then proceed to relate theories of organisation to this wider background. This book covers a great range of intellectual territory. It makes a number of important contributions to our understanding of sociology and organisational analysis, and will prove an invaluable guide to theorists, researchers and students in a variety of social science disciplines. It stands as a discourse in social theory, drawing upon the general area of organisation studies - industrial sociology, organisation theory, organisational psychology, and industrial relations - as a means of illustrating more general sociological themes. In addition to reviewing and evaluating existing work, it provides a framework for appraising future developments in the area of organisational

an effective measurement program. The book differs from others on the market by focusing on the application of the metrics rather than the metrics themselves. The author's provide information based on actual experience with successful metrics programs. Each chapter includes a case study focusing on technology transfer and a set of recommended references. The book serves as a guide on the use and application of software metrics in industrial environments. It is specially designed for managers, product supervisors, and quality assurance personnel who want to know how to implement a metrics program.
