This book is a systematic analysis of the modern English law of domestic sale of goods, covering in detail the following aspects of sale of goods contracts: * formation and definitions * passing of property and risk * mistake and frustration * contents of the contract and implied terms * delivery and payment * termination for breach * exclusion clauses * remedies and transfer of title. Full treatment is given to proprietary matters and the significant reforms which have taken place in recent years including the Sale and Supply of Goods Act 1994, and the Sale of Goods (Amendment) Act 1995. The general law of contract is dealt with as it affects the special contract of sale, but export sales materials are treated only to the extent that they illustrate delivery and payment. The paperback edition also includes a new preface designed for the student reader, covering recent developments in the sale of goods. This thorough and comprehensive book will be a valuable resource for students of commercial law as well as academics and practitioners working in the area.

This book comprehensively examines the entire legal process of the international sale of goods, beginning with the creation of the contract and continuing through to either the fulfilment of the sale, or the termination of the contract. Every day goods are globally traded between sellers and buyers in different countries and different jurisdictions. The distances between the parties involved in such transactions, and the relative risks related to that, are a key issue in international commercial sales. Sales of goods carried by sea, thus, differ quite drastically from domestic sales: the goods will be normally shipped at a port very distant from the buyer, preventing his physical presence at the port of loading. Further, the goods will travel in the custody of a carrier, a party normally quite independent from either trader. Finally, transactions concluded on shipment terms are normally irreversible, in the sense that shipping the goods back to the seller represents an unlikely option for the buyer. Traders around the world very frequently choose English law to govern their contracts, with disputes to be resolved through London arbitration or litigation. The basis of that law is to be found in the English Sale of Goods Act 1979, and the book consequently also includes an examination of the fundamental principles of that Act, as well as considering use of the Vienna Convention on the International Sale of Goods. This book will be an invaluable reference point for legal practitioners specialising in the sale of goods, as well as postgraduate students and academic researchers working in sales of goods and the international trade sector.

This work follows the scope of the sale of goods legislation and provides in-depth commentary and analysis of non-consumer sales between New Zealand businesses. It starts with an introduction, history and discussion of the scope of the legislation before moving into the mechanics of formation of the contract, and passing of property and risk. There are chapters specific to buyer s duties, seller s duties, buyer s remedies and seller s remedies, then the final chapter is an extensive discussion of international sale of goods involving New Zealand businesses. As an added feature there are comparative tables mapping sections of the repealed legislation to the new Act and vice versa. The value of the goods bought and sold each year in New Zealand that are potentially subject to the sale of goods legislation is enormous. Sale of Goods in New Zealand is a must-have purchase for commercial practitioners, academics and barristers and will ensure that you have the answers to even the most complicated challenges.
