"In this edition, Meyer's analysis of the correlation between newspaper quality and profitability is updated and applied to recent developments in the newspaper industry. Meyer argues that understanding the relationship between quality and profit is central to sustaining journalistic excellence and preserving journalism's unique social functions." -- Provided by the publisher.

With corporate balance sheets dictating what we read, freedom of speech is in peril -- and freedom itself may be compromised.

Winner of the National Press Club's Arthur Rowse Award for Press Criticism! From Craig Silverman, proprietor of [www.RegretTheError.com](http://www.RegretTheError.com), comes a lively journey through the history of media mistakes via a chronicle of funny, shocking, and often disturbing journalistic slip-ups. The errors—running the gamut from hilarious to tragic—include “Fuzzy Numbers” (when numbers and math undermine reporting) “Obiticide” (printing the obituary of a living person), and “Unintended Consequences” (typos and misidentifications that create a new, incorrect reality). While some of the errors are laugh-out-loud funny, the book also offers a serious investigation of contemporary journalism's lack of accountability to the public, and a rousing call to arms for all news organizations to mend their ways and reclaim the role of the press as honest voice of the people.

#1 NEW YORK TIMES BESTSELLER ONE OF BARACK OBAMA'S FAVORITE BOOKS OF THE YEAR NAMED A BEST BOOK OF 2020 BY THE NEW YORK TIMES \* THE WASHINGTON POST \* NPR \* PEOPLE \* TIME MAGAZINE\* VANITY FAIR \* GLAMOUR “Bennett’s tone and style recalls James Baldwin and Jacqueline Woodson, but it’s especially reminiscent of Toni Morrison’s 1970 debut novel, *The Bluest Eye*.” —Kiley Reid, *Wall Street Journal* “A story of absolute, universal timelessness ... For any era, it's an accomplished, affecting novel. For this moment, it's piercing, subtly wending its way toward questions about who we are and who we want to be...” – *Entertainment Weekly* From The New York Times-bestselling author of *The Mothers*, a stunning new novel about twin sisters, inseparable as children, who ultimately choose to live in two very different worlds, one black and one white. The Vignes twin sisters will always be identical. But after growing up together in a small, southern black community and running away at age sixteen, it's not just the shape of their daily lives that is different as adults, it's everything: their families, their communities, their racial identities. Many years later, one sister lives with her black daughter in the same southern town she once tried to escape. The other secretly passes for white, and her white husband knows nothing of her past. Still, even separated by so many miles and just as many lies, the fates of the twins remain intertwined. What will happen to the next generation, when their own daughters' storylines intersect? Weaving together multiple strands and generations of this family, from the Deep South to California, from the 1950s to the 1990s, Brit Bennett produces a story that is at once a riveting, emotional family story and a brilliant exploration of the American history of passing. Looking well beyond issues of race, *The Vanishing Half* considers the lasting influence of the past as it shapes a person's decisions, desires, and expectations, and explores some of the multiple reasons and realms in which people sometimes feel pulled to live as something other than their origins. As with her New York Times-bestselling debut *The Mothers*, Brit Bennett offers an engrossing page-turner about family and relationships that is immersive and provocative, compassionate and wise.

Describes ways of using the quantitative tools of the social sciences including surveys, analyses, and statistics to promote accuracy in journalism

"At once thoughtful and thought-provoking," *Beloved Beasts* tells the story of the modern conservation movement through the lives and ideas of the people who built it, making "a crucial addition to the literature of our troubled time" (Elizabeth Kolbert, author of *The Sixth Extinction*). In the late nineteenth century, humans came at long last to a devastating realization: their rapidly industrializing and globalizing societies were driving scores of animal species to extinction. In *Beloved Beasts*, acclaimed science journalist Michelle Nijhuis traces the history of the movement to protect and conserve other forms of life. From early battles to save charismatic species such as the American bison and bald eagle to today's global effort to defend life on a larger scale, Nijhuis's "spirited and engaging" account documents "the changes of heart that changed history" (Dan Cryer, *Boston Globe*). With "urgency, passion, and wit" (Michael Berry, *Christian Science Monitor*), she describes the vital role of scientists and activists such as Aldo Leopold and Rachel Carson, reveals the origins of vital organizations like the Audubon Society and the World Wildlife Fund, explores current efforts to protect species such as the whooping crane and the black rhinoceros, and confronts the darker side of modern conservation, long shadowed by racism and colonialism. As the destruction of other species continues and the effects of climate change wreak havoc on our world, *Beloved Beasts* charts the ways conservation is becoming a movement for the protection of all species including our own.

Money and journalistic integrity have often been at odds throughout history. Yet today, with newspaper business models struggling, there has been more tension than ever. This book goes behind the scenes and teaches readers about past and present newspaper profit models, and how big money can influence reporting and public opinion. Also addressed are new battlegrounds in the profit wars such as net neutrality and innovative business models such as hyperlocal news. This book asks the questions that no one else will and digs deep for the answers.

Five years ago in *The Vanishing Newspaper*, Philip Meyer offered the newspaper industry a business model for preserving and stabilizing the social responsibility functions of the press in a way that could outlast technology-driven changes in media forms. Now he has updated this groundbreaking volume, taking current declines in circulation and the number of dailies into consideration and offering a greater variety of ways to save journalism. Meyer's "influence model" is based on the premise that a newspaper's main product is not news or information, but influence: societal influence, which is not for sale, and commercial influence, which is. The model is supported by an abundance of empirical evidence, including statistical assessments of the quality and influence of the journalist's product, as well as its effects on business success. Meyer now applies this empirical evidence to recent developments, such as the impact of Craigslist and current trends in information technologies. New charts show how a surge in newsroom employment propped up readership in the 1980s, and data on the effects of newsroom desegregation are now included. Meyer's most controversial suggestion, making certification available for reporters and editors, has been gaining ground. This new edition discusses several examples of certificate programs that are emerging in organizations both old and new. Understanding the relationship between quality and profit probably will not save traditional newspapers, but Meyer argues that such knowledge can guide new media enterprises. He believes that we have the tools to sustain high-quality journalism and preserve its unique social functions, though in a transformed way.

An eviscerating look at the state of journalism in the age of the 24 hour news cycle by a Pulitzer Prize-winning television critic and a veteran news correspondent. *No Time To Think* focuses on the insidious and increasing portion of the news media that, due to the dangerously extreme speed at which it is produced, is only half thought out, half true, and lazily repeated from anonymous sources interested in selling opinion and wild speculation as news. These news items can easily gain exposure today, assuming a life of their own while making a mockery of journalism and creating casualties of cool deliberation and thoughtful discourse. Much of it is picked up gratuitously and given resonance online or through CNN, Fox News, MSNBC and other networks, which must, in this age of the 24-hour news cycle, "feed the beast." In dissecting this frantic news blur, *No Time to Think* breaks down a number of speed-driven blunders from the insider perspective of Charles Feldman, who spent 20 years as a CNN correspondent, as well as the outsider perspective of Howard Rosenberg, who covered the coverage for 25 years as TV critic for *The Los Angeles Times*. *No Time to Think* demonstrates how today's media blitz scrambles the public's perspective in ways that potentially shape how we think, act and react as a global society. The end result affects not only the media and the public, but also the government leaders we trust to make carefully considered decisions on our behalf. Featuring interviews ranging from former NBC News anchor Tom Brokaw to internet doyenne Arianna Huffington to PBS stalwart Jim Lehrer to CNN chief Jonathan Klein to a host of former presidential press secretaries and other keen-eyed media watchers, this incisive work measures lasting fallout from the 24-hour news cycle beginning in 1980 with the arrival of CNN, right up to the present.

As local media institutions collapse and news deserts sprout up across the country, the US is facing a profound journalism crisis. Meanwhile, continuous revelations about the role that major media outlets--from Facebook to Fox News--play in the spread of misinformation have exposed deep pathologies in American communication systems. Despite these threats to democracy, policy responses have been woefully inadequate. In *Democracy Without Journalism?* Victor Pickard argues that we're overlooking the core roots of the crisis. By uncovering degradations caused by run-amok commercialism, he brings into focus the historical antecedents, market failures, and policy inaction that led to the implosion of commercial journalism and the proliferation of misinformation through both social media and mainstream news. The problem isn't just the loss of journalism or irresponsibility of Facebook, but the very structure upon which our profit-driven media system is built. The rise of a "misinformation society" is symptomatic of historical and endemic weaknesses in the American media system tracing back to the early commercialization of the press in the 1800s. While professionalization was meant to resolve tensions between journalism's public service and profit imperatives, Pickard argues that it merely camouflaged deeper structural maladies. Journalism has always been in crisis. The market never supported the levels of journalism--especially local, international, policy, and investigative reporting--that a healthy democracy requires. Today these long-term defects have metastasized. In this book, Pickard presents a counter-narrative that shows how the modern journalism crisis stems from media's historical over-reliance on advertising revenue, the ascendance of media monopolies, and a lack of public oversight. He draws attention to the perils of monopoly control over digital infrastructures and the rise of platform monopolies, especially the "Facebook problem." He looks to experiments from the Progressive and New Deal Eras--as well as public media models around the world--to imagine a more reliable and democratic information system. The book envisions what a new kind of journalism might look like, emphasizing the need for a publicly owned and democratically governed media system. Amid growing scrutiny of unaccountable monopoly control over media institutions and concerns about the consequences to democracy, now is an opportune moment to address fundamental flaws in US news and information systems and push for alternatives. Ultimately, the goal is to reinvent journalism.
